NC DHHS, 6/14/21

# Percent Positivity – Local

## Percent Positive by County

Which counties are seeing a decline or sustained level of percent of tests that are positive?

It is important to recognize that the amount of testing being conducted varies across counties. Because the percent positive is calculated using only molecular (PCR) testing data reported electronically in to NC COVID, which is a subset of total tests reported, county-level percent positive rates may be impacted by how many of the total tests for residents in the county were reported electronically through NC COVID.

NC DHHS, 6/14/21

# Hospitalizations – Regional

Statewide  Region View **Filter By Region** MAHPC - Mountain Area Healthcare Preparedness Coalition

## Currently Hospitalized COVID-19 Patients | Region View

MAHPC	16	94%
All	16	94%
	Currently Hospitalized	Hospitals Reporting
