**RE: Buncombe County—35 Woodfin Renovation Advanced Planning
Professional Services Fee Proposal**

Dear Ronnie:

On behalf of CPL, we are pleased to submit the following proposal for Architectural and Engineering Advanced Planning design services for the renovation of 35 Woodfin in downtown Asheville, NC. Our proposal will build off the preliminary planning work we completed as part of the Comprehensive Facilities Master Plan. The Master Plan identified 35 Woodfin as the best location for a facility housing a number of “forward facing” departments that interface directly with the public to deliver services. For 35 Woodfin, CPL has completed:

- A building condition assessment inclusive of building systems and general building repair and renovation needs
- A 3D scan of the building in its current configuration
- Comprehensive interviews of each department slated to be housed in 35 Woodfin. These interviews identified current and future space needs; and have informed our team regarding best practices to address county space concerns
- A test fit blocking plan that illustrated how the relocation of Child Protective Services, EMS, Child Advocacy, DSS and START from 35 Woodfin to 40 Coxe will open up the opportunity to re-purpose 35 Woodfin to house inspections / permitting, air quality, environmental health, tax collection, tax assessment, register of deeds, 911 call center, EMS, HHS DV team, and development / planning. The Family Justice Center will also remain at 35 Woodfin.
- Developing a preliminary project budget of approximately \$25,000,000.

With the above work, CPL has established a baseline to build our Advanced Planning work on. Initial thoughts on key considerations to address in the Advanced Planning work are noted below.

Departments

The programming will consider the relocation of forward-facing departments to 35 Woodfin. These departments may include: Inspections/Permitting, Air Quality, Environmental Health, Tax Collection, Tax Assessment, Register of Deeds, 911 Call Center, EMS, Development/Planning, ID Bureau, and Family Justice Center.

Lobbies and Entries

The Family Justice Center requires a separate lobby for security and privacy concerns. The lobby should provide safe place for families and individuals that visit the family justice center. The lobby should be separated from the existing lobby and other forward-facing departments. The lobby design will also impact the exterior look of the building.

Planning, Inspections, Permitting and Environmental Health will require a separate sub-lobby (labeled “development services” lobby). A separate central meeting room core will serve these departments and Erosion Control. Tax Assessment and Collection will also require a forward-facing counter on the main floor in the central lobby for transaction purposes. These departments have a high volume of daily visitors. Security is a priority since

there is a safe and cash is stored on-site.

CPL and team will review city zoning parking requirements to determine if parking onsite is sufficient per code.

Signage and Wayfinding

Providing clear signage throughout the facility is imperative for visitors to navigate the space. CPL will provide a concept plan noting proposed signage locations. Exterior signage will need to be addressed on the front of the existing building.

Accessibility Approach

The existing bathrooms for the entire building have accessibility issues that need to be addressed. CPL will provide a concept plan to upgrade facilities to meet ADA requirements. CPL will review accessibility where the new Family Justice Center lobby is being proposed. All main entries to the building and sub-lobbies will need to meet accessibility and code guidelines. CPL will review where restrooms may tie into the department layouts in lieu of only lobby spaces.

Sustainability/High Performance Building

CPL approaches sustainability from a holistic, “high performing building” approach. We will look at all components of a building—the envelope, interior materials, building systems—as we address the County’s sustainability goals. Buncombe County sustainability strategies that we will consider in our planning work include:

1. **LEED Equivalency:** CPL will work with the County to identify a strategy to pursue the desired LEED Certified equivalency, which we understand to be Gold. At our initial worksession, we will identify the specific LEED pre-requisites and other ratings points that seem appropriate to this type of building renovation.
2. **Solar Power:** The County has set a goal to generate as much on-site power as can be reasonably produced--given available roof area--and then used by the building systems. Hot water, lighting and other systems will be considered as part of a solar/PV panel, collection, transformer and distribution system strategy. Other County projects have taken the approach of calculating a building’s power usage criteria over a two-year period, in which, an average peak usage was determined. The solar systems were then designed to 85% of that usage as a way to maximize usage of the on-site generated power. CPL’s team will work with the County to identify the specific strategy for this project; and incorporate into our system narratives. Current plan is to plan for solar on the roof after the roof is replaced. This will be assessed as to whether that scope should be included in this project.
3. **Geothermal and other alternate heating and cooling systems:** The County may want to consider using a geothermal or other HVAC systems in the renovated building. We will consider this in our conceptual HVAC system design narrative.

Other Considerations

- Growth: Consider spaces that can “flex” for future growth (i.e., a training room that could become offices or another function)
- Shared common use spaces such as break rooms and wellness rooms
- Impact of the County’s remote work policy
- Outdoor seating and meeting spaces
- Façade improvements to make the building more welcoming
- New exterior signage
- Determine the needs (program and adjacency) of the Family Justice Center and assess where those needs can be met within 35 Woodfin or whether it is recommended for them to relocate to a different facility if that is best for their needs.

Budget

CPL has completed an initial budget analysis of the potential renovation of 35 Woodfin as included in the Comprehensive Facility Plan. That plan identifies a projected project budget of approximately \$25,000,000. For the purposes of this proposal the construction budget is assumed to be \$16-20 million. We will update the budget numbers with the new plan.
