

Permit-Draft 5

To: the WNC Regional AQI

Bailey Bridgette

IB 4130
2015

I think the permit should be stronger. None of us need to break this in. Especially kids. And my aunt has an L.N.A.D. I am not sure if breathing this in would effect her, but if so I don't want her to die. She has a scar around where the cord goes into her stomach. It gets infected a lot, and she almost dies a lot. So imagine what just breaking this in is doing to her. That's all I've got to say. So, just think long and hard about that. Because, it's also, not just her. That is like that, or has problems where this could effect her body. It's a whole world with people who are like that, and can get effected easily.

Erin Thomas

I SUPPORT WNCBAGA

4/30/15

I Support them because i really
dont want to get some
kind of disease from breathing
Sulfur dioxide. They dont want
to fix it because it makes
the company look bad for
getting called out for their
company not being good. I think
they should just fix it because
many people like me don't
want to breathe that.

Ember
Garcia

4-30-16

Dear WNCR AQ,

I want the permit to be more strict. If they think its okay for them to do this, they are wrong. If the people here can't breathe ~~polluted~~^{good} air, they will get respiratory or whatever problems.

How will future generations breathe? How do you expect them to get jobs when they have breathing problems.

The last thing we need is for a future generation doctor doing a heart transplant, then gets an asthma attack in the middle of it.

If you think its okay for them to do this to us, put that ~~polluted~~ stuff in your backyard because I'm extremely positive I don't want it in mine.

Make the permit more strict. Because I don't know about you, but I like to breath fresh air, not polluted.

Shayla
Glaze

Dear, WNCLQA

I like to breath.. so I dont think you should give these companies the permit to keep "poisioning" us. It's not good for my community & my little brother who has asthma. They're killing my community & our ecosystem. So is not good for the environment - Thanks, yolo! ☺

by: Shayla
Pollution ☹

To WNC Roams

4-30-6

from the eyes of a high school student who is involved with many different sports, air is a nice resource to have especially when it's clean but when breathing something like sulfur dioxide (SO_2) it kinda becomes a struggle to breath. I know there are rules about how much pollution can be released and what help GPS scrubbers and filters in place to keep those levels of pollution down but up to me knowledge they aren't being used to their full potential and are still releasing a dangerous amount of sulfur dioxide into the air which causes damage like everything else and is landing in some heavily populated areas and is infecting atleast multiple people with asthma and different heart conditions. As a plea from someone who really likes breathing clean air Please do ke clean up our air.

Samantha Griffin

7/30/15

Dear WNCRAQA,

I really think that you should stop letting them burn SO₂ in the air.

It's not healthy to anyone really, but people do have health issues that aren't going to be helped if the air they're breathing is polluted.

I strongly feel that the permit should be more strict because they are thinking they can get away with polluting the air.

Newsflash, people need to breathe!

& anyone would rather breathe fresh air than polluted air.

So just make the permit more stricted so we can all be healthier. I

have asthma or however ya spell it,

& lemme tell you, it would suck to not even breathe clean air so just

do everyone a favor & make it more strict.

Sincerely,

Sammie

#YOLOTT pollution

#NO Good #dirtyair

#We #stop killing me

#Ima kill you #peace

#Swag #KMS cause of you

4/28/30

Dear WNCP, HQA

Loretta Gage

I think the air quality restriction should be stronger. They shouldn't be allowed to burn SO₂ in the air. It is causing more people to die, and more health problems for people. I do not want to be growing up breathing in SO₂. I want monthly monitoring of Duke Energy. I would want to know what they are putting in the air I breath. What I don't want is them harming our environment more then it already is anyway. I want them burning coal with less SO₂ in it.

I know they also provide electricity for everyone but I don't want them polluting the air while doing it. They need to stop harming people and the environment before more people die or get worse with health. If you think it's okay to do this then you carry it around all day and see how it affects you. I definitely don't want to become sick cause of the air quality. I do NOT want asthma or make people with it worse when they already are!!

Jeanie
Howard

4.30.15

Draft V

Dear WNC AQA

I know you need to make the requirements on the Draft V stronger. It's not right for the coal company to do that. They are putting future generations in danger and you're saying that it's okay? That you're not going to do anything about it? Do you not see how wrong that is? Do you not care about the future generations? Sure we need electricity but is it really worth the diseases and cancers that the output can cause? Is it worth not being able to breath? Is it worth putting the future generations in danger? As well as the wild life? I know the coal company gets billions of dollars in profit and they have made the scrubbers less effective. So why not make them use the money to make the factories cleaner? Yeah, I said factories because they all need to be fixed! How

Chelsea Jones

4 - 3045

Dear Duke energy, I ask
that y'all please use safer products
to help our environment and our
health. I think the precedent you
guys have made to be strong,

so our environment is healthier
and safer. So₂ is killing people and
also kids our age, younger & older
are having more health conditions
now then ever. Asthma is getting
worse, heart conditions are worse.
Even if you guys use a coal
with less So₂ would help a lot
more. But I ask that yall
take it into consideration and
do what our community is asking.

MacKenzie Lusk

9-30-15

Draft 5-

Dear WNCAGA,

You are polluting the air that every one in Asheville is breathing. My Sister has asthma. When we found out that she had asthma, the doctor said that her lungs where only 60% working. We've lived in Leicester for all our lives. The air that we breathed in for 15 years have been toxic because of you. And you could be the reason that my Sisters lungs where only 60% working. Why would you want to make innocent people sick?

Jasmine
IB 4/29/18

Dear Duke Energy Please
make your permits stronger because
we don't want to pollute our
community with SO₂ its toxic
and will certainly start health
issues and will negatively affect
our wildlife plants, and some
of our beautiful mountains away.
It will effect our behaviors and
children. Also our fresh water
resources.

to: WNC Regional Airquality
Agency

Draft V permit

4.30.15

Hello, I am a student at Erwin High School. I am here to advocate against passing Draft V permit, which would allow Duke Energy to continue Spewting dangerous amounts of sulfur dioxide (SO_2). You are a government regulators agency, you are here to protect the interests of the public. Sulfur dioxide air standards go up, as the future generation continues. Frankly, you've failed that, instead opting to serve a corporations interest. If you honestly think you can continue to do this out set out with it, you might be right, but I will not stand by while you serve them over our let Duke Energy pollute us further into the air. You have a Moral, and naturally that, requires responsibility to us, as citizens to prevent this kind of stuff. You've failed us, and failed at your job, so congrats & good.

With regards;

Michael Murray

Eric
Pritchard
April 13, 2011

Draft Veto Memo

To Wncogo

Review the petition for Duke energy how
are they allowed to let dioxide pollute the
air and killing citizens or it is their will
responsible for the many things we
the communities people. How are you
gonna fix this when somebody could
be sick because of the pollution
in the air while you just let it
happen stop Duke from adding more
pollution in the air and the other
people drink Duke shouldn't be allowed
to do this your actions have so
consequences.

1/30-75

Victor J. Gutierrez ACO

NO, NO MURKADA DON'T DO THAT Because people live here and they don't Desirer to Die, how about your family that are you doing and how a bout your self was stuck you'll like that to people to die.

S²⁰ IS BAD Because you can Die of SUICE But Do not I do ever because it is not safe to do it.

Hat stuff can people Dead you will also Because of heart gass. we should stop with doing that so people can't suffer of that and he can't have a smog or heart disease Because we don't need it!

To the WNC Regional Air Quality Agency.

Jake

Stevens

IB

4-30-15

Dear WNCQA; ~~I~~ Put more care in protecting the air we breath. It's not right to poison people without even telling them. It's not right to poison people at all. So I think you should do your job correctly or what's the point of doing your job in the first place? What gives you the right to affect people's lives? How would you like it if you were getting poisoned without knowing it?

Julia Willett

Block 1b

I am very disappointed in the lack of protection over our air quality. 4-30-15
If Duke energy is alright with people like me getting lung issues and asthma then they need to be taken out of business. My cousin, my best friend, my grandpa and many other people I know already have asthma/lung issues. It scares me that I could be next.

It is awefull that until today I was unaware about this air quality condition. No one told any one my age (teenager) about this. It concerns me that a problem as significant as this could fly under the radar.

If Duke knows that what they are doing is bad then why would they keep doing it? It is selfish and greedy. I love science but I would never want to work for a company so irresponsible and careless.

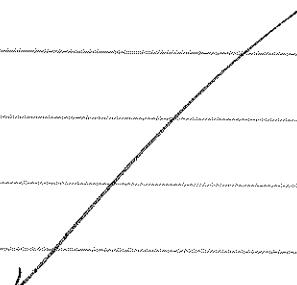

If you think that no one will find out or care you are wrong. Speaking on behalf of other teenagers my age WE CARE!!

Clean up your mess.. before it gets any more out of hand. There are enough health problems in the world as it is.

Duke HQ A^o

Jyler
Allen

I want my air to be clean. I'm 15 and I don't wanna die because Duke Energy can't control the poison they are putting out. They need to decrease the SO2 limit. People are paying for the air to be ~~poisoned~~ poisoned. They need to put in heat monitors to see what's heavy going on.

Asthema

I Am against this because it is killing and hurting our animals. We need our Animals because we need food. Y'all need to cut down on the So₂ because that is what is hurting people and our Farm land. I don't want to die at a young age I want to live my life how long i want to. people with ASThma + respiratory problems are getting hurt and are in the hospital.

sydney blair (14 years old) 4/30/15

Draft V

Hi, I'm sydney Blair. Why are you letting Duke Energy kill me? By letting them pollute the air, you are basically killing me. They are producing poison. the people that pay for power are being poisoned by SO₂. Do you want everyone to die? All of the newborns are breathing in this air, being poisoned from day 1. These regulations are unrealistic. You are saying you care more about money than the people that breath the air. To the WNC air quality agency, you breathe this air too. put yourself in our shoes, if it were you, you wouldn't want to be breathing this polluted air.

Jacob Boyd Age: 15 4-30-15

What I think that is if it
hurts farming and fishing. Then
I really tick off about this.

Because you wont eat with no
farm or fishing. That is my two
cents \$. So I really don't know what
it is or what it does. But if
it kills people something is wrong.
If it kills crops its bad. If it
kills fish its bad

4/30/15
erwinhighschool
16 years old

Draft V

) Sierra Breisacher

The fact that I have to write this is just stupid... Do they not understand that it is harming people. We have to breath this crop in. Also its going to hurt the farms, the food we eat will contain this crop as well.

Duke just needs to step its not always about money. If they keep harming people then no one will be alive to give them our stupid money.

You are making people sick!! So enough is enough, everyone needs to help each other. I get im just 16, oh im a kid I dont even know what's going on but your wrong. In the future, my generation is going to be living here breathing in this crop. Im gonna have to live in your mess. Duke needs to open its eyes they are going to hurt their selfs. It might be great to have all this money, but in the end people are going to die. I have to worry now that what I eat might kill me the air that we breath will now hurt my lungs.

April 30, 2016

Dear WNC AQ,

I want and need clean air. yall Shouldnt let DUKE energy do this. I need to breath. Youre affecting the way way life is turning out and killing my bows

(15 years old)

Draft V

Emilee Crenshaw, 4/30/15, Clyde A. Erwin High

The air that we breathe is very important. Pollution in the air is increasing everyday. I don't want me or any of the people I know developing any type of disease. Why are you letting them pump deadly air? Do you want people to die off, or get sick? The fact that this is going on is unbelievable. I want clean air for myself and my community.

We're not paying to get sick from our air, we're paying for clean air. It's almost like they're doing it on purpose because they don't care. I may be under the age of 18, but I am still capable of standing up for what I believe in. If the air isn't clean, people are going to get sick, or they might die, acid rain levels are going to rise, and with acid rain comes damage to wildlife, trees and our own crops. Please, do something about this. I want the amount of SO₂ cut or lowered. There needs to be a change. Some of my family members have asthma and respiratory problems like sleep apnea. I do not want them exposed to this. Please, make a good change.

Skyler Hall age:15 4-30-15

If you care about the air you breathe then you will put an end to this. Y'all are not thinking about the future and the young kids y'all are just thinking about y'all selves. Why are you letting Duke Energy do this? My little brother has Asthma do y'all not have kids, nices, nephews, grandkids.

Nick Jones

Erwin High School Student - 16 yrs. Old.

Yo. Man I keep our air [REDACTED] clean. we need to breath clean air. It kind of pisses me off that you guys are continuing to let them poison our air, harm our animals, etc. Yall need to step up your game, and stop them from slowly killing us. Your [REDACTED] continuing to let them make it harder for people with COPD, Asthma, etc. harder to breath. You need to step up your game. Yall need to stop the huge amounts of distribution of SO_2 in our air.

ENS

meagan Kennedy

age: 15 2015

I think that they should stop doing this because we should not do this any more because we are paying to poison us and it could harm plants, animals, farms, and stuff like that why like you letting them pollute the air because also could cause diseases and this could just make everything worse so WNC Regional Air Quality they should have to follow the EPA rules and not get like a special treatment and they should have to put the scrubby things back - They are destroying the mountains the surface water and destroying the place where we live and this could just make people sick ruining where we live and all this they should do something about this. A lot of people want this to be changed so do what will keep use safe decrease the level of sox in our air and its just safe because things are dying and people are getting sick

Josy McKeown

4-30-15

WNC Regional Air Quality Agency,
please help stop exceeding the
federal health-based standards for
Sulfur dioxide. Why would you let
Duke's coal-fired plant near Asheville
anyways? Our air is VERY important
and what you're allowing is insane.
This is the air we are BREATHING
in! We want and need clean air
in our community and we shouldn't
have to worry about sulfur dioxide
pollution where we live or work. We
shouldn't have to pay you if you're
allowing our air to become poisoned.
PLEASE STOP THIS!

HELP US, NOT KILL US.
Please take this seriously and choose
a numeric limit in this permit
that will protect our community.

WINCAQA

15 years old 4-30-15

Erwin high school Student : Jessica Beatriz Miller

Vall should really stop! Keep our air safe!

We use that to breath not for us to die.

We pay them for us to live not Die! :-)

Duke Energy should stop producing as much Sulfur Dioxide. Some people are poor and don't have money to pay the sicknesses that they get from Sulfur Dioxide.

Also our plants and trees are slowly dying. And animals are dying because of the bad air. :: Slowly everybody is going to die because its there fault. Find a new way for us not to get intoxicated with air.

04/30/15

AGE

Tyler Richardson

15

TBH I don't want to die
so clean the air up or
just stop putting this bad stuff
in the air. Cause JS I die it
would be your fault. Duke ~~is~~
should meet EPA standards. I don't
want to keep breathing SO₂
or whatever you're putting in
the air or at least
decrease the SO₂ in the
air. Some people used to
hunt, fish, go camping, have bonding
time with family. But they
can't without breathing the stuff
in.

WNC Regional Air quality,

Wednesday evening at Erwin High School, several Asheville citizens met to talk about the air quality in Buncombe County. I do not think the Duke Plant Should Keep Releasing Posion into our air. We are literally paying for them to poison us. We shouldnt be paying them, or being posioned. Duke Should meet the EPA's rules and Stop Posioning us. We want clean air in our community and dont need to worried about Sulfur dioxide emision5. Please consider the citizens in our community thals being Posioned and we paying to be posioned. Its not okay. Help us, not kill us!

Savannah Shuey 15 years old
4-30-15

WNC Regional air quality agency,

You guys are really pissing me off. I live near Leicester. I do not approve of my family paying you to poison us. My grandfather has a very hard time breathing and that honestly pisses me the hell of that you guys are letting us pay you to poison us. That is not okay at all. I want clean air for my family to breathe period. I am sick of everything wrong that is happening in this world. You guys are stupid. I cant believe this is even happening. You know, this world is going to get crazier and crazier. You are poisoning us with sulfur Dioxide. You need to decrease the amount of SO_2 in the air. As soon as possible. All you care about is getting our money and doing with it what you please. You guys need to tell Duke to lower the SO_2 and meet that to the standards of what it should be and stop being lazy.

Sincerely

A concerned civilian in Leicester

Kathleen Updike
Age=15

WINCAQA

You need to stop being selfish and actually care about peoples lives.

Our earth is already contaminated enough and if you have a chance to make the earth a better place

You should try. We breathe air without it we die but now breathing it kills us too, so stop this madness.

If you are the Air Quality Agency it is your job to protect the air

that we breathe, so start your

job off right. Stop trying to be cheap and catch the bad air.

You need to make them stop nobody is doing there job right.

If we pay for the bill we shouldn't pay for the kill.

Stop making everything die Sulfur Dioxide causes Acid rain that kills vegetation and pollutes all of our food and water.

Duke is making people die. Nobody wants to pay for their own death. Make breathing problems better rather than making them

Age: 16

JIM SURRETT

EHS 2015-4-3

The EPCs should not be allowed to pollute the air we do breath.

They should have to meet up to the Air Quality Standards. They should not be able to poison the air with SO₂ they should have to stop or buy the scrubbers to stop the pollution.

age: 16
date: 4/30

Aaron Falbert

- My opinion on this that this is really serious, so I am against it. Only because it's hurting plants & animals & foods, like Fish, poor people fish to eat. Air is important, and I think it's dumb what Duke is doing to this country.

- It's dangerous for people who has asthma, they could die. Farming wouldn't be possible. It's gonna ruin the population, the environment. The biggest reason why I really don't agree with this situation is because we want have trees or Fish or plants. If we have no air we want have anything.

Caleb Allison

4-30-15

dear regulator,

It comes to our community is starting to realize your company and factory is making about a billion dollars or more to pay all employees salary to fix trucks and all fixed expenses. Then have over a billion dollars or more in profit and for some reason cannot seem to pay to keep the stacks running. to clean the soz out of the air. all because it costs a little extra we deserve clean air because that was my money I pay for regularly.

April, 30, 2015

Dear WNC Regional Air quality Agency

MY Name is Savannah
baker, I would like to share
my thoughts with you. I do
not think you should go
through with the title five
draft, please fix it / make it
better so it can safe guard our
air. As of right now the
regulations that are being followed
to prevent pollution due to SO₂
are not working. This SO₂
pollution is effecting every one
in buncombe county not just

Taylor Lane

4/30/15

Dear WNC Regional Air Quality Agency,

At Lake Julian at the Duke Energy plant they are releasing SO₂. This effects everything outdoors. With SO₂ it creates bad air and water quality. Also wildlife is being destroyed by this.

So Duke Energy is using a lighter SO₂ coal too. So they need to turn the scrubbers on at a higher level where less of the SO₂ comes out. I love to be outside and you can make it safer.

Thank You
Taylor Lane

Alex Chmurnick

01-30-15

Please stop doing that bad air ~~stuff~~ ←
there are 20,000 people in unincor-
porated with Athosman and that can
hurt them. So fix the tidal 5
things and make the air better for
our community so people can
live longer and we can go outside
and have fun with good air, not bad.

Thank you

4-30-15

Christian Dockery

Dean WNCRAQA

I am here to talk about Duke Energy's power plants and how they are giving out 5 times the legal limit. I also don't agree with title 5 draft, I think it is too lenient and doesn't provide enough safety regulations. I my self am an asthmatic and

April 30, 2015

Ana Perez-Antoni

In my opinion, I think that they should not let them be doing this because there are thousands of people who have Asthma, and when they contaminate the area it makes it hard for them to go on with their daily lives. SO_2 is bad for people any ways. It can also cause acid rain. They need to start being more clean because people die. People want clean air for the community and don't want to be worried about sulfur dioxide pollution.

Jose Prieto-Huertas

4/30/15

Dear WNC air quality agency

Lots of Asthma attacks are being caused by these factories that providing us energy. That 'we' say to be killing earth slowly we would like them people, companies to coming up with something better other than this Duke energy.

This Duke energy is polluting this poor earth. Most of the people aren't helping with recycling, now Duke is going the earth, the water species we in danger. Because of all the plastic in the water. Now even us, humans, the trees and animals are being passed by all this. This is why we gotta put a stop to this.

11/13/15
Please stop releasing SO_2 into the air. Pay it forward and help out our community by keeping our air safe. There are thousand of kid that have Asma due to SO_2 . You make a lot of profit already so for no way you can't take the pledge.

Jusgin Quintero

Brannon Robinson
4-30-15

Imagine living in a world where there is hardly any clean air, plants can't grow, and more people end up with breathing problems and heart disease. There are already thousands of people in Buncombe County alone with breathing problems and as one of those people I'm asking you not to renew the air quality permit. Please, you could save and help so many people.

Samantha Rogers April 30, 2015

Please dont let them do it because it's affecting our environment it's make our waters bad for us many people that Asthma can get more sick and I'm one of them I dont want to die I dont want to go outside with the risk of getting more sick I love being outside my two little sisters have asthma too and they get it worst and know how that feels I dont want to get it everyday and not just that what is going to happen to our air, water we need it for life and we cant live with out it.

we can recycle cause with one pound of cans we can make our tv work for at least 30 minutes or we can use Solar panels well your not going to get that much money but think about the people that are dying.

Angel
Salto

4-30-15

Dear, WNC Regional Air Quality Agency

My name is Angel Salto I attended Erwin highschool, and I think that the permit should be for the better of our community. There are people who are suffering due to pollution caused by Duke's power plant and can't do anything about it. Duke's power plant has been making money off of people's suffering for too long. And I personally don't want to see my community suffering. And don't want it to affect future generations.

Thank you, Sincerely
Angel Salto

4/30/15

Duke Energy,

I read the recent article in the Citizen Times, and I want to express that the Title V draft shows and pitches a very bad idea. SO_2 is a serious threat to our way of life in Western NC — a threat that is difficult to mitigate, but it must be done nonetheless. As a personal victim of SO_2 -related asthma among millions of others, it is clear to me that SO_2 is serious—serious enough to not care about the expense of eradicating the problem. The rate of 62 lbs of SO_2 being released per hour is frankly disgusting to imagine, and the whole ecosystem is suffering from it. Acid rain, asthmatic attack triggers, and the terrible, terrible stench are among these problems. I sincerely ask you to revise the Title V draft to exclude the whole "saving money" gimmick and save some lives for a change!

With respect,

Daniel Sanner
CEO at Dark Memes

P.S. This is like actually not saving lives, you would just be improving the lives of the future... and the future as a whole.

Macay Scott

4.29.15

Dear WNC Regional Air

Quality Agency I live in Leicleser NC. I just recently got the news that the Duke coal-fired plant is releasing large amounts of Sulfur dioxide known as (SO_2). Sulfur dioxide is known to make heart disease worse and is also known to be the cause of asthma attacks. As you probably are aware of there are thousands of people who have asthma and or heart disease in Buncombe county alone. I know that you are also aware that SO_2 is the reason for the acid rain that is polluting the trees and plants. Not only does it effect Buncombe County and the people who live here, but it affects the environment. We paid for the scrubbers for the Duke coal-fired plant they could do us the courtesy of using them properly. Please do not approve the draft for title five. Fix it to where they have stronger regulations to fix the issue at hand. Thanks.

WNC Regional Air Quality Agency

Olga Shostak
4-30-20

Imagine living in a world with no clean air. Hardly any green trees, acidic rain, and walking around everywhere you go with a mask on your face. If you think about it, it kinda really sucks. Also, what you (or Duke Energy) will be paying for that is going to be a whole shit ton more than a little bit to use some scrubbers (Pardon my French).

I know all you care about is money & the profit you will get for burning more coal but everything you do and don't do to keep up the SO₂ or eliminate it effects your life, your kids life, and their kids life and it will keep hurting the way they breathe and live.

SO₂ has a huge impact on the entire worlds ecosystem. It travels by air & rain and that rain and air goes all over the world. It kills wildlife, and pretty much destroys your lungs. It's kind of like smoking.

What happened to fixing our problems instead making them worse? Why aren't we doing as much as possible to ~~get~~ get rid of pollution? Is it really that important to have money instead of having fresh air and a perfect environment to live in? Is it that hard to make Duke Energy use some scrubbers? Are they in charge of you? Is their job to regulate and make sure what they are releasing is 5 times over the 'good air' limit? Please consider,

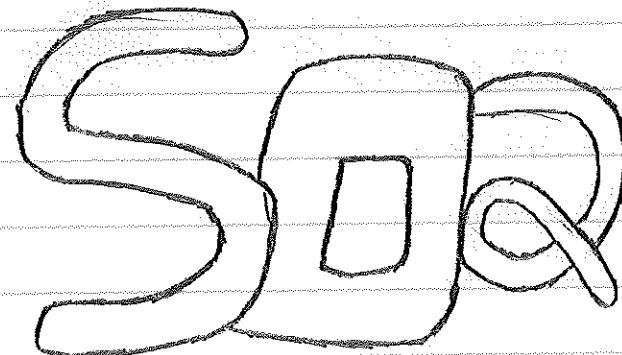

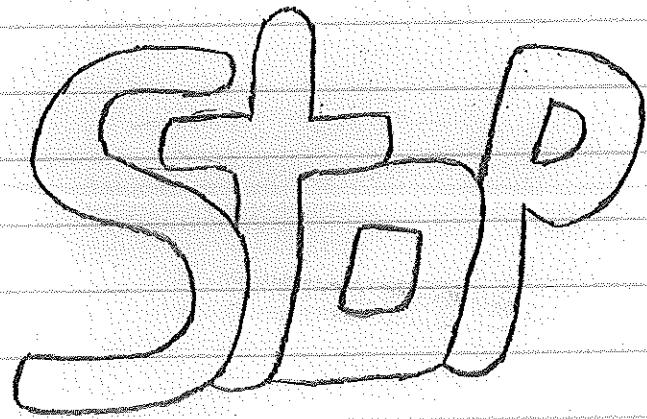

Thank you

Olga Shostak

Tim Tishchenko 4-30-15

Please stop this pollution. I have seen many people die from cancer. Aren't we trying to stop cancer? Why do they just keep doing this?

I want to live a healthy life and do what I usually do outside. If you do not stop this we won't be able to have those family cook outs we won't be able to see your kids grow up. So PLEASE take what I'm saying, SPEND some time with your family while you have time. If you let them do this you are killing yourself not only others.

My name is Liliya Trach and I live in Buncombe County where the air I breathe in everyday is polluted with SO₂ because of the Duke Industry. Thousands of people in Buncombe County have Asthma and Heart disease which gets worse if you breathe in SO₂. By allowing Duke to release more SO₂ in our environment our lives become more at risk. Please do not approve the draft because I was raised in the Buncombe County district so everyday you allow Duke to keep releasing SO₂ you are affecting every human beings future. My family has lived in the same house for about 8 years and where we live is higher up on the mountain in Leicester which is part of Buncombe County which means it is affecting my parents and my siblings and I honestly can't imagine my life without them because of SO₂ so please don't put our lives at risk instead help us be healthier and live in a safe environment.

Tim Veselovskie

4/30/2016

All you guys think is Money, you think only \$FO how you can get more money or save money. We people pay them to get good, clean energy. But what they did was buy scrubbers which was good but they turned the efficiency down too SAVE money. They as in Duke energy can bribe you, you have the choice to accept it or deny it but first think of all the people breathing this dirty air, all the kids going outside to have but they don't notice what they are breathing. What about all the workers that work there and are exposed to it? Think about your kids. Please consider this letter as a request not a demand.

Ashlyn
Wolfe
April 30, 15

Dear WNC Regional Air Quality Agency,

Please fix the title five draft before issuing it to Duke Energy. My understanding is that their factory does not operate in the safest and healthiest way. So I am asking you to rethink this draft for the benefit of the environment and generations to come! There are thousands of asthma sufferers in the Asheville area and the SO₂ that is being released is not helping them. Duke energy is allowing too much pollution. I think we need to monitor the air as well. Making predictions without data is not good enough. So on behalf of my community and I, I ask you to research and rethink this problem. We need the healthiest living conditions as possible and I believe you can help us to achieve this goal! Thank you for taking the time to read this and taking into consideration others opinions.

Sincerely,

Ashlyn Wolfe

Sarah Wood
4/30

Please fix the title 5 draft. It is harmful to the people, wildlife, air, water, basically our community. The chemical SO₂ is very dangerous. I know many people with asthma, my brother, boyfriend. And there's thousand more just in Buncombe County. The chemical isn't good for children either. Definatly our air, I mean we're breathing that stuff in & it extremely affects us. It messes with our wildlife, killing and harming animals changes a lot. With the food we eat, the animals that live here, even peoples jobs maybe. It affects our water too. We don't need any more problems, and by fixing this, a lot of risk factors decrease. Why purposely cause harm to people and there environments when it can be so much better?

4-30-15

Haylee Wyatt

I think you should rewrite the Title V draft. We have many people with asthma that could be harmed. As a source from the news a woman said you are trying to "stop exceeding the federal health-based standards for sulfur dioxide". Yet, you refuse to get Duke Energy to run their scrubbers at higher efficiency. Plus, instead of using monitors to calculate actual data you decide to let people go off monitors. You are putting everyone's life at risk. Especially, the ones that have serious problems with their lungs. Please do not let Duke continue harming our community.

Title VI Draft marinze

I am almost 16 years old and Robertson
I think that they should tighten 4-30-15
the requirements because some 4th
people wants to feel safe about
the air that they are breathing
I mean me myself I have asthma
and I honestley I wouldent want
to breath air or drink water
that I know could poison me
I mean you got to think about
all the younger children in the
world and I wouldent want them
to breath that and I Love to
go kickng and throw the ball
and things and if the WNC RACA
is going to release toxins into
the air that I breath and
knowing that the air that I breath
can cause me or someone else
that has asthma an asthmatic
attack breathing in the SO₂
could kill me and I dont want
that not to mention that it is
polluting the soil which will pollute
the food and water that people
eat and drink and I dont
want that because I dont

Draft V. Duke Energy

Priority

Jordan Holbert

4-30-15

Dear WNC Regional Air Quality Agency,

My name is Jordan Chase Holbert, I am 16 years old, & I attend Clyde A. Erwin High School. I am writing this letter as a comment towards the decision on improving the requirements of acquiring a permit to pollute the air around the Duke Energy Power Plant. Before I start, I want you all to picture your children (if any of you have children); now I want you to picture your children in a hospital bed, breathing through a respirator, due to an asthma attack. It's a scary thought, isn't it? Well, due to your lack of action, 100's of children in Western North Carolina are living that nightmare.

You are indirectly polluting the air with sulfur dioxide, which is directly harming &/or taking the lives of innocent children; an atrocity that could be solved, if it were not for your lack of moral values. Your inaction is killing people, do something about it & stop Duke Energy Progress from polluting our air. If you do nothing, you will not be held responsible for the deaths in a court of law, but remember that you all took those lives, & your pathetic excuse for a soul will be tormented while you're tucking your kids into bed at night, because you will know that you are the reason another parent will not have their child to tuck in every night.

Nijia Allen

4/30/15

WNCRQA Title 5 Draft

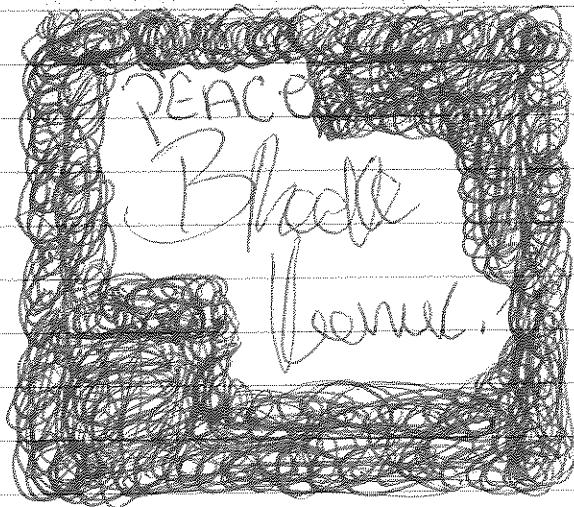

Stop the Pollution!

The pollution of our Earth is a heinous crime and a very dangerous thing. Pollution destroys ecosystems, seeps into our water, kills innocent creatures, and endangers the health of human beings. Toxic chemicals like sulfur dioxide are to blame for this. As those who breathe this air and drink this water, sulfur dioxide puts us and our loved ones at risk.

Therefore, we should be doing everything we can to stop the release of this poison into our atmosphere. As a financially 'obligate' minor, I don't have much say in what gases Duke emits; however, you can stop it. So do it!

It is your responsibility to do what you can to protect yourselves, your families, your peers, and your country from what you can. So, for the sake of our Earth and those who inhabit it, please put stricter regulations on the draft so that we can live in a cleaner, safer environment.

Brooke)
In general it's permit
o. heavy do not care. I breath fine
and so does every one else
in my family we don't have
~~breathing~~ breathing problems. It's not
good but it don't bother me.
Yes S.S what the world is now
~~accept~~ accept it. We
are all going to die one day.
We can not change what
they do, a bunch of ~~people~~ people
getting mad cause they are
polluting the earth 100% around.
There is a whole lot bigger
problems then this. Other electric
pieces are doing this to. It's
just they care not near us
so we don't care hu?.

4/30/15

WNC RAGA Title V Draft Rhannon Cole

Duke Energy needs to toughen their PERMIT because having SO₂ in the air isn't good for health factors. I think it's highly idiotic and irresponsible that this has been going on for over 5 years and knew about it but were too lazy to work on now filtered their air was. Will it cost money, you bet, but it's a lot better than people with respiratory and heart problems breathing in sulfur dioxide and it making it harder for them to breathe. It's effecting kids future health too because kids play outside all of the time and them breathing it in their lungs is awful. It's not a crime but it seems like it is because it's slowly killing people. Acid rain is a serious issue and so is Global Warming.

WNC Raqa title 5 draft maya conley

I think Duke energy Should 4/30/15

has tougher standards because

the air all around Asheville is getting polluted. It's not healthy. And they

need to find a way to not pollute the air as much. It's not okay that

they knew the air would get polluted w/ sulfur but they still continue to

pollute the air and dont even try to fix it.

Tyler Cummings

4/30/15

WNCRAQA Title 5

The Duke power plant is polluting WNC by using 2011 standards in their plants and not utilizing the scrubbers the people payed for. The WNCRAQA needs to put stricter regulations on their draft and have the plant CHP down on pollution by utilizing 2015 standards. The power plant is spewing CO₂ which not only contributes to the pollution of the environment, but also asthma, chronic lung disease and other physical illnesses. The projections of "who it might affect" are ridiculous when you can stop it from affecting everyone.

4/30/15

WNC Page little S

Addison Goode

It doesn't really bother me about it. But if it is going to harm me or my family then they need to fix it. I think that they should make their standards more higher than what they have it as now. They wouldn't want it to harm them or their family so why wouldn't they want to be able to fix that problem.

If they did it could lower the chances of someone getting harmed from it.

Everybody deserves to breathe fresh air and not no air that could hurt them in some type of way. I think that they should use the scrubbers so that the chances of someone getting harmed goes down. They should use monitoring because it would be more accurate about everything instead of just taking guesses or how it is gonna be and the modeling.

4/30/15

WNC PHON title Unit 5 draft Haley Hendley

Okay, I think the government is sneaky. Even if we got everyone in the country to try to stop this it wouldn't work. I believe the government is trying to kill off so much of the population. So, even if we got a bunch of people to disagree with it nothing would happen. But, I would still try but I doubt anything will change. Plus they had it yesterday and the dead line today. Sneaky. Probably so no one could go against it. I do want to be healthy & live long so I would try.

Diana Ilinykh

4/30/15

WNC RAGA Title 5 Draft

I think they should be more strict about what they put in our air. The sulfur has been in their for 5 years. They knew about it for 5 years. They aren't asking to put in new scrubbers or to make huge changes, they have the scrubbers in place already but they are running them at a lower efficiency and burning sulfur. We just need them to stop running so high and run it low. ~~You made one job~~
~~its not that hard.~~

I think things should clean themselves
because I do not want to get sick

WNRAQA Title 5 Drive

Johnathan Uribez

4-30-15

I'm against it 100% because it's pollution, I don't want to grow up in a environment where I got to worry about what part of town to step in. This is income we shouldn't even be in the position where we should be worrying about this type of stuff. Our lives depend on the way we build our community, and Duke Energy somehow has the right to over pass the "Clean Air Act." Y'all are basically putting y'all selfs on the top of the fuel chain. Duke Energy is not only breaking the laws, but is also releasing Sulphur Dioxide into the air, I don't want my nephew to grow in a corrupted environment. The WNC Regional Air Quality Agency has all my support if your going use the scrubbers the use them at a higher efficiency rate.

WNCBAQA

Title: 5 Vrath

Derrick Thompson 4/30/15 (B)

Stop Duke Stop Duke Duke needs to stop
The pollution cause it's killing everything
Plants, tree, Animal, people & it's also taking
part off cars and it can kill you, your brother,
your sister and everyone in your family and
if you're worried about your family then you should
either Help Stop Duke or make it Sales And
be fair and if you don't care about your
family then think about you or the things
around you that you love and care about and
just think about how it can hurt what you care
about and if you have A brother or Sister
or you know someone or if you have A Son
just think about if more trees get killed
How hard would it be to breath and there
pollution in the world Already that's just making
it worse and killing more right now Duke
to me just means kill kill kill cause that's all
it's doing and most of you wife say oh that All
the way over there that can't affect me yes
it can it's like Second Hand Smoke if wife
not affect you or someone else right then & there
but later on it will affect you and others.

Anthony
Samuel
4-30-15

WNCA RAGA Title 5 draft

I think the policy on the scrubbers should be enforced more. I have asthma and if you all are too lazy to actually enforce this policy y'all need new jobs. And the people at Duke energy can't be responsible enough to do they're damn job! What's the point of the plant if its affecting the people they're trying to help. You people are exceeding the safety limit of sulfur dioxide pollution in the air. You all are treating this like that paycheck you get every month is more important then the lifes y'all are affecting. Remember its your familys life too. So you think how you'd feel if some dumbass was ruining your hometown. I got the right to be pissed off. You have one job and you can't even do that.

4-30-15

Ok, so I don't really understand what's going on, but I do know that what ever you're doing, is making people ill and polluting our earth. All it really takes is to use the scrubbers properly, that way; some lives can be saved and our future generations don't have to suffer as much as we are now. If running scrubbers at a lower efficiency and burning high sulfur content coal allows you to have more cash in your pocket, congratulations! More money for you equals more innocent children getting sick and dying. Hope you do your happy little dance now when you get your check.

Noah
Heflin

Title V Draft

4/30/15

Dear Duke energy please stop polluting. I understand that we will allways put out a little ^{soot} but if we put the filters on the smokestacks, I have asthma and so does my whole family. This is a big enough problem already and we don't need you contributing to it. You are hurting people. It needs to stop. Just think if you live around here you are harming yourself and your family as well. Just because we all die doesn't mean we need to jump into an early grave. What about future generations? If you want your name to be carried on you have to leave the earth in good shape so they can live a happy life too.

Sincerely, Noah Heflin

Title V Draft

Tamera
Surff
April 30, 2015

I think they should make it to where there are less pollutants in the air. I think this because people with asthma have a hard time breathing. My 12 year old Cousin has asthma and he has a hard time breathing sometimes its really bad. The SO₂ is bad and it kills trees and crops and sooner or later its going to kill us as in us I mean humans. This is a serious matter please don't take it lightly.

Title V draft

Ashley Steepe

4-30-15

I think that they need to do something about the air. people breath air every second of our lives. people has asimum and the SO₂ could cause health issues to lots of people. Breathing in all this is very bad for everyone. they either need to fix it or shut it down.

4/30/15

Title V Draft

Michael

Monell

We have a basic right to clean air not just humans, every living thing does. From what I gather there isn't much of a reason to believe this air is clean. There are people with asthma in this community. What will happen when it gets too bad? Things will die. I am by no means afraid of death, but I don't welcome it either. Fix the issue with the SO2. I fear what could happen to these forests, mountains, rivers, this is my home, and I hope to see it thrive for the future generation. I am a man who wants to do the right thing. I may only be 15, but I already feel like I could do a better job at protecting us, the thing the older and wiser people should be capable of.

Title Draft

Haven Ramirez Perez

April 30, 2015

I want the WNC Air Quality Agency to stop because there are a lot of people who don't want that sun as kids, parents ect. It's not safe to breath the air like that. You need to stop the power plant. Honestly can you just think people getting sick? or that are already sick but that are getting even worst then they are now. That's not good, I like being outside and I wouldn't stand the air like this. Would you want your family breathing bad air? They can get sick or even worst. So I think you should just stop to be honest. I care about this. And no thanks for what you doing!

from Karen P.

gordon
Bennett

Title V draft

4/30/15

I would like the filters / scrubbers turned to there maximum capacity. If humans with big lungs that can adapt to so² to a serfing amount and the companies. Think of all the animals, plants, and your son and daughters. Would you send your daughters into a gas chamber and lock the door. Well that's what you are doing to us if you don't use the filters to its max that we PAID for.

Title @ So2

April 30th -

Dylon Chaves

I think that we should change what's going on with Duke. What they're doing is horrible with So2. Duke has so much merch money so there excuse about money is gonna fly. It's killing trees and causing health problems. This issue can't easily be changed and it should.

Title V Draft

April 20, 2015 Maria Arellano

// They should decline it, because it's affecting everyone's health, it's causing asthma to many, harming people's health, poisoning the water in our lake and our air, it may not seem much of a big deal to the Duke energy company but to everyone else we're worried and no one wants to do anything about it. People that come to Aspinwall expect some expectations but when they do come it's just nothing they thought it would be. The company should just lower down the pollution (the bad air) from the good. Imagine what it could do if it was still allowed, what do you think it does to everyone's lungs? Even the animal's lungs? We all want to live in a safe place and still be alive.

Haily 4/30/15
Brendy

Title V Draft

I believe Duke energy should just go on and fix the problem now before it becomes too big of a problem. I am a softball player and I don't believe that it is fair for me and my team to be breathing in SO_2 . This stuff can cause asthma. This is serious stuff. We are talking about a serious life-altering disease. Think about it, if I had the ability to give someone cancer, and I did, I would go to jail, but because you guys are a company, no one is punished. This needs to be stopped. It's simple, just fix the problem and everyone is happy.

Haily Breey

4-30-15

Title V Draft. Olivia Cojocaru

WNCRAGA maybe it does not feel like a big deal now but we can not continue to keep polluting our land! We are already dealing with global warming everywhere. And now this? If you do not stop this air pollution you could be one of the people that will get sick. This area is our home. Don't you treat your house with respect by cleaning it? That's what you need to help with! To clean the air and take care of our area. Does Duke energy not realize that SO_2 affects our breathing?

One of the most important things our body does to survive. But no I guess Duke Energy just has to continue making its stupid 1 Billion dollar profit every year; as if that is not enough money. I will not lose years of my life breathing in this air because a selfish power company wants to keep their wealth. You have the power to do it, so why not? This is for an entire community.

Dante /
Garcia

Title V draft

11-30-15

I would like them to maximize the Pollution detectors so that they can realize how much pollution is being released into the air. Because if they don't stop this people could die.

TITLE V DRAFT

Brodee

Hyder

4/30/15

Oblivious citizens of the surrounding area have little knowledge that the air they are breathing is harmful. My brother and I both have severe asthma. My mother has COPD. My father who passed away in 2013 also had COPD. My mother loves being outdoors, in her garden, fishing in the river, planting flowers. It is not safe for anyone to breathe this air that is ridden with SO₂. It is making the citizens of Western North Carolina sick, and poisioning our water and soil. Crops we grow are becoming poisioned. With all the other problems in the world, poverty, hunger, drought... the least we should have to worry about is the air we breathe. Please consider the people, plants, animals, waterways and more that this air is harming.

Thank you.

Marciyah Davidson 4-30-15 Title V Draft

I would like to see requirements tighten because the less pollution the better. I know a lot of people that have asthma and what about the animals with small lungs. They can't do anything 'WNCPCA' can stop and it's really bad for not only people who have asthma But for people who play sports.

Title V Draft

Sam Warren
4-30-15

I feel that it shouldn't go through like it is now. I feel this way because it make the air out and inside unsafe. People have the right to go outside and enjoy life. The pollution sulfur dioxide in the air causes asthma attacks. As a result of this forming, hunting, fishing or just going for a picnic, I want to have our clean up tries mess one I think I speak for mostly everyone.

Ki'Sun Lindsey Title V 4/30/15

Dear Duke power co,

I think that the polluting in the air and chemicals in the air is bad for us to breath especially the people that have asthma (I have asthma) and i already have problems from just running a lot. So i dont think that we shoudnt give them the permission to keep doing this to our air. I dont think that this start is good at all to me it is really bad. It also can cause people to have breathing problems because of them do to keep doing this to our air. Other companies dont even do this so i really dont think that they should do its.

TITLE V

Alexis
Hunter
2015/30/15

I would stop the permit. I would stop this because they are polluting the air and making it not safe to drink the water. The SO₂ is killing plants and animals and also humans. It's causing more and more humans to get sick. It needs to be stopped. It's hurting their own families. The more resources that we lose the more plants, animals and humans we loose. So I don't think they should turn over the permit.

4/30/15

Maisiey Wett

V draft

We shouldn't

give them the permit
because they are doing a lot
of damage. Some people have
really bad asthma and obviously
you don't want it to get worse.

So² is killing basically everything.
That's obviously not good at all
because some people want to live
a long, healthy life, including me.

I do not have asthma but
some people in my family
and some of my friends do
also. I'm thinking about them
too. Including my best friend...
so they need to stop.

4/30/15

Jordan
Fore

Title V Draft

I think the permit for the air Quality for Duke Should not go through. This is a problem, and not just for people. This affects birds, trees, etc.... Breathing is like our birth right and Duke is taking that away from us and all the other species. It is also unfair to all those trying to be healthy and active having to breath the air outside. So this Permit Should not be given for the peoples sake.

1001 II draft WNCRAQA

Rachel Hom

4-30-2015

I support the regulations making the air quality requirements tougher. For it is important for our air to be healthier than the bad quality it is now. The chemical being released (Sulfur dioxide) can be very harmful to the air everyone (including you) breathe. The chemical causes health problems which is why the healthy air act should be enforced. I know you don't care about the air the community breathes because you don't understand the harm it may do. You aren't admitting that your stupid and ignorant decisions are hurting the people around you because all you care about is filling your wallets with cash. But yeah you go ahead and kill people or seriously harm peoples health because you don't want to loose your precious money.

4/30/15

Title 5 Draft

I support making the air better. I prefer being safe. Make the regulation stronger. I believe that we need to be safe because that's the air we breathe. I am a 14 year old, and i want the air i brealne in to be safe. I think they should make their regulations stricter. I want clean air and im pretty sure everyone else does too. They actually need to use the regulations and requirements in the system. I wanna be able to live for a long time. So i support. I wanna breath clean air. So i just wanted to make my point clear.

Thank you.

Gabrielle
Peters

Title V Draft

Apr. 30, 201

I support toughening the draft. I support creating higher regulations. The standards are made to ensure the safety of the environment. The WNCGBA should keep us safe. The only goal should be keeping us safe. SO₂ has to be lowered and all action should be taken to stop and reduce the amounts of SO₂ released. They need to reinforce the Clean Air Act. To continue using Duke they have to be cleaner. This needs to be laws of taking readings to create proof they have changed. The draft needs to change. The problems blind eyes cause are no longer excuse. Things need to change. Protect the people. Protection and Projection is the only way that people don't have to worry and fear the air they breath.

Emily Redman 9-30-15

Title: ~~pollution~~

I dont think they should let them let the Bad STUFF out into the world and air. cause its Bad for every thing, its Bad for Pigs, Birds, air, water, lakes; Rivers, cows, trees, and what they need to do is stop what coming into the world and make good STUFF come into the world and they need to amire that its ~~is~~ bad for the world.

Title V Draft

Mary McGraian

4-20-15

I support making the regulations tougher, in order to preserve air quality. I don't feel like we should ~~overdo~~ release Sulfur dioxide into the air if it can be prevented. Human health should be a top priority over anything else.

We as humans should feel obligated to keep our Earth clean and this obligation should take priority over personal agendas. I have to live on this planet for my whole life and I don't want to breath any air that isn't the best. I feel like human life is the most valuable thing and this takes priority over money and everything else.

To conclude rewrite the draft so that me and all of my fellow classmates can live in a healthy world.

Dylan Russell 4A 4/30/15

Title V Draft WNCRAQIA

I believe that bad air quality is a unhealthy risk for everybody. They should try new things to try and make the area a healthier and safer place for everybody. Hopefully something can be done to make the environment better. People can get very sick from the air so hopefully something can be done.

Little V Draft

Dear WNCRAQA

Samantha Marino

4/30/15

Dear WNCRAQA

I support the toughening of regulations. I am a student at Erwin High School. My mom was diagnosed with cancer in October. So with all of her treatment she's left more exposed than most people. I didn't know you guys were pumping all of that sulfur dioxide into the air. It upsets me that you are. There are a lot of people already fighting uphill battles, they should be able to at least trust on having clean air. There are people who will suffer long term consequences. But it's all about the money right? You don't care who your hurting who you may be even killing. YOU DONT CARE! Its all about the money, all of it, if it wasn't then you would have made a move to filter the sulfur dioxide. You are monsters, and you are a monster because you know its wrong and your doing it anyways.

Brittney Ortiz
4/30
4B

Idol V Draft WNCRAQA

I support making regulations to make the air cleaner. If they put the draft in it will make the air quality. I agree to make the air safer because it's what we breathe, duh. Soz makes things unhealthy and that is what is coming from the thingy ma'jig. I'm freaking fourteen and a half, I have a life ahead of me, I want to BREATHE. I don't get people like you. You don't do the right thing to not loose money but if you're dead, what was the point? ha-ha-ha. I don't know just be safe and keep people safe or whatever.

Title 5 draft

Jenny Sanchez
4/30/15
40

I support the making of regulations thorough to make the air better. No, I don't think its right that DUKES company is polluting the air. It's their air too! do you want to breathe in sulfur dioxide? do you want your young loved ones to die over breathing too much sulfur dioxide? Human health should be the first priority. DUKES company should stop immediately! there's no second guessing about this!

Kelby Jones

4-30-15

Title V Draft

I think they shouldn't pollute the air because living condition in that area are going to get worst & they got payed to solve the problem but to make money they went back to polluting the air when can cause people to die or have bad health problems and it's their fault for Soa being released in the air and they should follow regulation & the clean air act.

WNCR AQA

Jonathon Worley
09-30-15 4B

Title V Draft

I believe that the air quality should improve. The sulfur in the air is affecting many people in that area. The Clean air act should be enforced because sulfur dioxide is harmful to people and the environment. Every one deserves to breathe clean air.

Hazel Kidwell

4-30-15

Title V Draft

I do support to make air cleaner. The company shouldn't be putting pollution into our air. People have been dying, breathing in the air of the pollution chemicals.

Title V Draft

Alex Cogocari
4-30-15

I don't think they should pollute.

I disagree with WNCIAQA, they shouldn't release SO₂ into the air.

It can kill animals, forests, and even humans. It's becoming a big problem. I don't want to breathe bad air.

If rates exceed federal guidelines, they should stop releasing Sulfur dioxide. People need to make an effort on stopping it. Wherever they work or live they would want to not be worried about the pollution.

Idol 5 draft

Lexi Gleydura

April 30 2015

I support the regulations to make the ~~the~~ air better. The Sulfur Dioxide Levels were tested by the Sierra Club & they were above the 75 parts per billion federal guidelines. Sulfur Dioxide is the ~~the~~ ^{thing} hurting these people. The EPA is already a disappointment to me. I've already heard about them ignoring my teacher (Rute MacQueen) with his water near his house be contaminated with bad chemicals. What I see here is another thing the EPA will lie about to not spend money. It has been proven that the sulfur Dioxide is too high. All they have to do is run the scrubbers at a higher efficiency.

Title V Draft

Nicole Johnson

I disagree because that harms the environment. It can cause acid rain or SO₂ that can harm the environment, and it does not want to breath bad air. Also why would you want to dump pollutants in to the wild life. what kind of person does that. besides greedy, money loving people who do not care about the environment, but they will figure out real soon that what they are doing is bad for the environment and them.

Bradley
Cole
April 30th
2015

Title V DRAFT

In all honesty, I believe there should be much stronger regulations against any coal-fired plant. They pollute the air which in turn comes back down and not only harms the earth but us also. Yes I do not have any respiratory problems, but yet I wish to stay that way. If anything the power plant should either be moved farther away from any form of civilization or switch to a form of energy production that is more efficient and cleaner than a coal-fired plant. And also I do want to have children, but I want them to have a good future.

Sincerely,

Bradley Cole age: 15

Title V Draft

Mark Masangka
4/30/15

I don't want them to pollute our air and also if they are going to make the plant, then they should tighten up the regulation so that the air being blown out wouldn't be so bad. I enjoy going outside so if the air is too polluted, then I won't be able to enjoy the outdoors and play sports. I hear that SO_2 could cause asthma which is bad for future generations because they would also have breathing problems and be able to go outside and play like we did.

WNCR AQA

Breanna

4/30/14

TITLE FIVE

I support the air qualities cleanliness. There are a lot OF families that suffer from the toxic air. Toxic air can ruin your lungs, and get in your blood stream, which could cause a list of illnesses. Especially for children and the elderly. Not only is the toxic air affecting people, it's affecting plants, and animals as well. So you're destroying all living things. Do us all a favor and clean up the air.

Thank you for reading,
Breanna Stout

Title 5 Draft

Jazmin
Baguio

NB

4-30-15

So basically you state money to make the levels of SO₂ to go down but no you just built something that releases more SO₂. I support that you guys should regulate the permit. Go back to 2011 rules. Toughen up the rules releasing more SO₂ will cause environment to be greatly affected. You already have the scrubbers but they are working at low efficiency. Mostly people living in the mountains will be affected. Have you monitored the air or you just don't want to see what you have caused. Only computer models have been used which is not accurate. Why have you only used computer monitors? Answer because it's cheaper. You don't care about the people or children that will be affected either. If you don't toughen up the ~~states~~ permit you will cause damage.

Matthew

Gaddy
4/30/15

I don't agree with the little V permit because it isn't actually helping people. It is just saving money. Although you may not care or realize how many problems this is causing, but the facts are that there are at least 20,000 Asthma victims in Buncombe County alone. The so² that they are releasing into the atmosphere is hurting and killing lots of people. So they need to change their ways of obtaining energy before it is too late. There has been enough suffering already. Don't let there be any more.

Anna Alexseyenko
4/30/15

Title V Draft

They need to decline, right now this pollution will effect people it will trigger really bad asthma. If it effects asthma how do you think it will effect mothers with children in their womb, children can be born unhealthy. When people come to Asheville it's for a reason, it can be to look at wild life, visit the beautiful woods. But now because of this pollution it can kill the wild life and kill the trees. People come here with expectations, for live clean air, now we wont have clean air, our air is slowly polluting. People want to build beautiful mountain homes but now they cant because all that So² is coming into the air and is in the mountains. If we dont stop this it will cause many problems, Asheville NC is suppose to be a clean city but now its slowly becoming a graveyard, or soon will, animals, plant, people, BABIES! Cannot survive, I want to live a healthy life I want to explore more of Asheville but because of this I cannot. Stop this and decline it to make Asheville safe and healthy.

Title V Draft

Jacqueline Mestanza

4/30/15

Honestly the WNC Regional Air Quality
Should stop the Duke company because they're
warming the air and I'm pretty sure they're
aware of what they're causing. They're causing
people to get sick and maybe even more sick
than what they are. If you don't stop the power
plants we're going to do damage to the animals
and the plants, we know basically every resource
that helps us out like trees help us breath,
they give us oxygen... don't you want to keep
breathing? Animals breath the same air we do,
if you can't breath animals won't stop the power
plants, they also give us food that you might
eat everyday... now what if these animals
die? we won't have food, what all we are to will off.
There are many people that enjoy being outdoors,
like myself... I play soccer and I don't want
to be outside in a air that isn't safe to
breath, and could cause problems for my breathing
and my family. Think about the families,
think about your family... do you want them
breathing in a environment that isn't safe. Just take
the time to think about this, it could cause
SO MANY problems and you can stop it!

Fifth Draft ✓

Khalid Remond 4-30-15

I support making the regeneration
cycle. I want you to stop
the compressor to stop so
the air can be clean cause
I don't want people to die
over dirty air cause we
need clean air to live

Title v draft

Chance Bryant

4-30-15

I believe that we as a community should give everything we got. Toughening the permit because, i believe in breathing! I believe that people should go outside and breathe in quality oxygen. If we let Duke energy just "turn off" the new high tech stacks. They took in the money from the consumers, built the stacks, then let SO₂ into our air for profit. People are wearing respirators!

Also, it's not a choice for Duke! Duke doesn't just say "We're not going to use what we didn't pay for." Another thing being, someone (law enforcement) are to blame. They haven't enforced the clean air act! I strongly believe in this situation. Please help make Duke stop killing people! And causing sicknesses! And having people scared. Thank you for your time.

Title V Draft

Maria Pena

April 30, 2015

Citizens of your community depend on you and your company. But, they are very much unaware that your industry is polluting the air and hurting them. Leaders of your company need to be required to inform the people. I am only a freshman in high school, which shows people of this generation need change. Would you want your child breathing in toxic air? This is our home, planet Earth. It is all we have. By your business letting out gases, it hurts every human, plant, animal, or organism. This is a serious matter that needs to be addressed. No one wants to live in a world where the people are ignorant from lack of knowing what's going on. Please look into this problem, because it affects everyone and everything.

Little V Draft

Logan White

Samantha Mano

4/30/15

Dear WNCRAQA

I support the toughening of regulations. I am a student at Erwin High School. My mom was diagnosed with cancer in October. So with all of her treatment shes left more exposed than most people. I didnt know you guys were pumping all of that sulfur dioxide into the air. It upsets me that you are. There are a lot of people already fighting uphill battles, they should be able to at least trust on having clean air. There are people who will suffer long term consequences. But its all about the money isn't it. You dont care who your hurting who you may be even killing. **YOU DONT CARE!** Its all about the money, all of it. If it wasn't then you would have made a move to filter the sulfur dioxide. You are monsters, and you are a monster because you know its wrong and your doing it anyways.

4-30-15

Title V Drafted

Shelbie

I support making the regulations stronger. I don't want you to use the permit that you have I think Duke should use the stronger one. Please Duke use a stronger draft I need my air clean. I don't want to not feel safe when I go places. I go to BP every weekend. I would like the air to be clean when I go. I don't wanna die. Please check it. They need to enforce to clean act.

4.30.15

Debby Short

Honestly, I don't care, my teacher is just making me write this. But my opinion is that we need to do something about it because people are being harmed.

Just Fix the title five draft

Because It could effect me, my family and future generations.

But do whatever to fix the problem or your gonna keep getting crap like this letter.

SO₂ is harmful to the environment.

it causes acid rain and that could ruin someones life. So, just change the draft and we will get better and no more letters about it. Thanks for reading this. Enjoy the 50 others we sent in.

- from,

Debby Short
at Euvin.

Caitlin Taylor 4/30/15 V-Draft

I support making the regulations stronger. I don't want you to use the draft version. I feel as if safety comes first. If we go about our wants for this power plant we won't be safe. I would not like to breathe bad air that can harm MY life. I'm only 14 I would not like to be harmed with bad air. Just make some changes, please NO POWER PLANT. Where did the Clean Air Act go?

Yours,

Caitlin H Taylor

4.30.15

Madison Sonnag

Dear WNC regional air quality agency,
I think that you should definitely not continue with the title 5 draft. It should be fixed and be improved, to keep other people safe. It isn't fair that the polluters can continue to harm us anymore. Please make them change their ways. It is ridiculous that the pollutants are reaching as far as Leicester. They are slowly hurting everyone, and some people don't even know how bad the pollutants are. Thousands of people in Asheville have asthma and this is triggering asthma attacks, and can help cause asthma. What are the polluters going to do when this causes people to have an asthma attack, and someone dies? or even a child die? This is ruining our atmosphere and our community. This is causing health problems like heart disease, which is already the leading cause of death in American people and with the SO₂ it is making that number increase. This SO₂ is pretty much killing us or making us have many health problems. Just think of

how this is affecting your family,
your children, and you. This is
going to be a huge problem if
the draft is not made more
efficient. Please do the people a
favor and save us by stopping
the SO_2 in the air. Please.
Thank you,

Madison Scruggs.

WNCAGA Title 5 draft

4/30/15

Charlynn case

I feel like they should not be putting Sulfur dioxide in our air especially if we paid for them to clean it. They are polluting our air and it is landing where we live. They are exceeding the safe levels and need to do better at the job they have. I think this is unfair for the tax payers. I don't see why they can't just turn them off if they are already paid for.

Scott Amaranto

Title ✓ draft

4/30/15

I would like to see the requirements tightened to decrease the amount of pollution. Not only is this polluting the earth with so and co, it effects our health. It has caused asthma and killed people. Also, Duke can easily afford it. Not only did consumers pay extra for this, but Duke also makes a \$100,000,000 profit every year. They have more than enough money to fix it, and fixing it would be beneficial to everyone's health. The earth is a necessity, \$1,000,000,000 a year, is not.

4/20/15

Title V Staff Connor Quincy

I would like to see the requirements
tighten so they can lower their output
people aren't safe in they're because
of this plant I know asphalt but it's
not so bad of a type but still it's
a problem. It effects pretty much everyone

Kirstin

Gosnell
4/30/13

WNCA RAQD Title 5 Draft

My statement on this issue is that it's really ridiculous, that the N.C. taxpayers money is not being used appropriately. Duke energy should understand the cause and effect concept, if you take out the scrubbers in the stacks that catch the deadly chemicals, there will be some negative effects to come from that. I believe they should take more time to think about their ideas, before they make hasty decisions that effect peoples lives and property. It's the residents money, we should have a say in what it's being used for, especially if Duke energy is using it to make their life easier and not helping us.

Samantha C.
Clyde A. Erwin
April 30, 2015

Hi, I'm Samantha Case. I'm 14 years old and I'm very worried about our air. It is not safe for people to breath the air. The air is very dangerous for people and if people are sick they are getting more sick or they could even die. The SO₂ is killing the trees, animals. It is hurting farming and hunting and fishing. If we lost all the animals and plants we would have no food. We need to stop Duke power and make them make it safe for people and animals. I want to live long and living a healthy life. And I think I speak for the rest of the people too. If you don't stop the power plant everyone will get sick.

Title V

Kaitlyn
Evans

Why are we paying to poison April 30th ourselves? I havent been alive 15 years old for long but I feel that EHS student people after me would need clean air. Hint Hint. How is this even legal? How can we just sit around and let ourselves be killed? We cant buy coal Duke because we need energy to do things. So₂ is killing trees, animals, farm land and other things. So what if its expensive to have clean air. Heaven forbid people want to live without having lung problems. This is stupid. Its like someone spilling coal ash into our rivers. Oh wait. Why not just killed Leicester? Its not like we matter. Just please raise the standards for environment safety. Im 15 but my sister is 2. She will grow up in poisonous air. Please dont burn these.

To: WNC Air

EHS Student: Benjamin Farford Age: 15 4/30/15

I think that our air is important so let us keep it clean. I think that Duke energy is way out of line by poisoning us and not sticking to the rules. I think you guys should not use computers to use air monitoring so it is the actual data. I think that Duke should stay with the EPA standards so we do not get polluted. Duke should take responsibility for its actions and make our air safer again and not produce SO₂. Please do something to make our air safe again to breath. If they don't do something then our animals will die and our land will become a waste land. I would like to keep our stuff nice so please reduce the SO₂ levels.

Air Quality

Garnett Fedoch

April 30th, 2015

Age - 14

Glyde A. Erwin High.

I think we shouldn't be with Duke. One's suffering for the greed of Duke energy. Duke is obviously only concerned about their wallet size, and not the public's safety. Why would ANYONE let this happen? Duke is letting computer model's monitor the air instead of monitors just to save a few bucks. Duke needs to meet EPA standards. We can't wait any longer!

Your polluting water, polluting air, and destroying our beautiful land! And you're worried about money? What is wrong with you people, it disgusts me.

How much money is worth a life?

Cristina

I am a student at Erwin Felipe High School. I live in the Leicester area. I have a family history of diabetes. Honestly I don't want myself, my mom, sisters, or any other family member getting that disease. I would like to please ask if you could help clean the air. Please. The pollution in the air could damage our crops and animals. the ones the farmers grow with so much care.

Think about that.

EHS

Sondra

I think it is time for Freeman to get rid of Duke Energy.

I think something should be done about this.

Why is Duke energy polluting the air we breathe? Polluting the air out pets and farm animals breathe?

This pollution does'nt cause acid rain which could kill our animals damage our houses and cars also our plants and crops.

Duke energy should meet U.S. EPA standards and not be allowed to operate any more if they can not do so. I have baby cousins who breathe this polluted air. Not to mention other families with young ones. Please do not let duke energy continue to pollute our air with SO2.

Draft V Permit

Henry Romeo
4-30-15

Dear, WNCACAA

Duke Plant should not be allowed to dangerous Sulfur Dioxide into the air WE breathe. Money isn't more important than kids & Adults that have asthma. These could possibly die if they breaths this dangerous chemical. Even if they live the could cause mutations for generations to come. Start monitoring & regulating these chemicals that are being pumped out. If this Sulfur dioxide chemical begins to kill our animals & food than people will protest. It could hurt the economy and people would begin to move outside the city if this chemical hasn't gone to those places yet. This is enough. It could permanently cause problems with lung issues. The public will soon be breathing intoxicated air sooner or later if this continues. I believe this permit should limit the amount of Sulfur dioxide released by Duke. Higher Fines should be paid so that they know consequences should happen. NO More EXCUSES! DUKE ENERGY HAS DONE ENOUGH!

(WNCRA QA Title 5 draft

4-30-15

Duke Power Polluting

Vadim Korochuk

Hi I'm Vadim Korochuk, and this is my opinion on Duke energy. First of all you can't use OUR money for something we did NOT want! I want to live my life, have kids, and never get sick! However, I can't even look forward to that day due to these power plants NOT contributing to the community. I wish that one day we find a CLEAN source of energy, and that we may live a life without us getting sick and dying, due to diseases like cancer, anyway I don't want my siblings, and parents to die early, due to companies putting in cash, and not making a clean power plant, why can't you guys add scrubbers, IT's our money, the least y'all can do is add a scrubber to keep the air clean, using the old solution is the WORST idea I've ever heard of! Make a NEW solution! It is completely ridiculous to Not make a new solution, to solve the air problem. But the air we breathe is very important for the future, if we can't make this right, right now, we live a short life and die with sorrow, but any way have a nice day. Grow up.

I want you to fix the five
five drafting. We can not
be exposed to that amount
of SO₂. its dangerous for us,
especially when its five times
the maximum amount we should
be exposed to. If they start trying
to reduce the amounts of
SO₂ they might loose a few
dollars, but Duke is making a
profit of over one billion dollars,
that means that after they
have payed all the bills, Duke
still has at least one billion
dollars. If we continue to destroy
this earth, that money that you
care so much about is gonna
be useless when you have a
breathing problem or when you get
hurt from all the SO₂ that
is being exposed. A clean earth is
worth losing a few dollars, especially
when you make over one billion
dollars in profit.

Michael Izak

Helsie Hughes

I think that you should not be putting soa into my neibnorhood. I am helsie hughes and I am 15. I live in leicester and I hear that my family and garden may be harmed. I think you need to go to the Duke power plant and tell them that they cant be harming people like this. There is many people like me that rely on their crops and farm animals to feed their family. If they take in so much of this they could be harmed and maybe even die. People need more than this. They need to not be paying you to be posisioning them. I think that is obsquared!

KAYLYN MOORE
Emin High Sch
Age: 15
Grade: 9th

I feel like we should have a healthy air for us to breath. ALSO, I feel that you shouldn't be stingy with the money our parents raised you to keep our air clean and non polluted.

The SO₂ that is released in the air is causing people of the community to become very ill and it's basically your fault because you failed on trying to keep our environment clear.

SO, I beg you to please keep our air clean with the money WE GAVE YOU TO do so.

Draft V permit

wncagg,

Carrie Speigl

First I would like to question Clyde A. Erwin High
why it took so long to discover
this problem? Where you really

4/29/15

going to give them to have a
permit to produce more SO_2 . If you
look at human population, tell me this,
how many people have lung cancer, or
asthma, Any type of breathing problems?

most of it is because factories

like this, you shouldn't even have to
debate about it, you technically ask
people "Do you want to agree with it and
kill yourselves" or "you can disagree fight
from it and have some clean air left"

well i choose to disagree with it,
I don't think they should at all,
I don't think any factories should
be allowed to produce any pollution in
our air, water, or life ranges, But the
thing i hate the most is that it
took you this long to realize all
this, I wonder if you ever looked at
the other factories polluting the earth,
our world will one day be nothing
due to the increase in all this

technology, It needs to END! Belize by
agreeing with it your allowing people
to poison your friends, your family but
you as well, I think its really dumb

this will even be unfortuned

I'd like to grow up with a family not having to worry about the chemicals my kids will be breathing in, I don't think anyone should have to worry,

And that's all i have to say
as of Now

Yours
Carrie Feigle

Jade
Dickson
April 30th,
2015

Hello, My name is Jade. I am a fifteen year old freshman student at Clyde A. Erwin high school. The quality of our air is important, and we need it to breathe. Poor air quality is dangerous to our health. People with COPD, asthma, and other breathing impairments are put at greater risk for their symptoms worsening. Infants, toddlers, newborns, and the elderly are also at greater risk of complications from poor air quality. My younger brother age 7 gets sick very easily. When he gets sick he has a horrible cough and slight problems breathing. If the air he is breathing gets worse it will make it harder on him. My mother has asthma, the poor Sulfur dioxide emittions could trigger higher complications for her.

The fish in our rivers could die. Sulfur in the air can cause acid rain. The results of acid rain include pollution of water ways, killing of aquatic life, crops being diminished, and plants dying. We all need the air to live. We need clear air. Not air polluted by SO₂, or any other chemical or pollutant. Please

Duke energy meets the required standards.

Our community is at risk. If this problem isn't solved then what will become of our farms? Our forests? Our children and grand children? Or the future of our community?

I don't want my brother living in bad breathing conditions. I don't want my mom to need an inhaler every where she goes. My future children and family are at risk with this situation. I don't want to worry about anyone I love being at risk of illness, disease, or even cancer.

Please fix this issue. keep us safe and help us to breathe safely.

Sincerely,

Jade Dickson

Wesley
Cisco
4/30

Dear WNCRAQA

I'm glad that your trying to help with air quality but the chance of a company wanting to spend money on having bad air quality is low most of the time a company will not open mindedly admit to having bad air quality from there own factories. With enough time & money spent on proving them wrong but if you really think that if by just having a group of community try to prevent them, good luck I hope you can I know that its bad.

Diego Barron WNCRAQATHE5

4-30-15 2B

Me and my family think that Duke energy should clean up these systems because it affect me and my family knowing we are not breathing clear air and the sun is very hot I don't want to worry about growing up in a unhealthy environment.

Duke really needs to enforce this policy because coal are effecting lots of people with asthma. Coal are exceeding the safe limit of Sulfur dioxide pollution in the air.

You are mess up the pond and river and killing the fishes and killing nature.

Duke goes to the River

Mizie Maffit

WNCA RAQA TLL Draft 4-30-15

I think that what Duke Energy is doing is terrible. All the chemicals that it is releasing is bad for the planet. And if they're not going to stop they should at least go about safer ways of doing things. It's not safe for the public. And for a matter of fact its a lot of people who live near that area. And for Duke to be releasing chemicals like that knowing that there is families with children near by is heartless. Also, I think everyone knows that this is obviously for the money and that money really does rule the world. And in my opinion it's quite sad. Things really do need to change before it is too late. Also, everyone who is in charge of Duke need to be fired and replaced with people with common sense.

4/30/15
2B

WNC.RAGA. Title S Draft

Selena Moore

I believe that they are wrong for doing this. They are harming people and harming things on earth. I think they need to fix this because it could get worse. This stuff could start really hurting us and could continue. So I think they need to stop it while they can so they don't do anymore damage. I don't think it right to take our money to make something that can harm us.

4-30-15

WNCAQ draft
Logan Williams

I think that the Western North Carolina Asheville Air Quality Agency should stop the pollution. Buncombe county is already in enough trouble but if the air quality continues to worsen then it would make Asheville unsafe to live in. For example take a look at California, because of all the car exhaust many cities have unsafe toxic air, plus if Buncombe county ~~has~~ has this happen it ~~is~~ could possible that all our air can be toxic.

Kelsey Ownbey

Waca Raga title 5 draft 4-30-15

I think Duke Energy Needs to Stop because they are putting pollutants in the air. That's not good for my family or anybody else that have Breathing/Heart problems it doesn't help w/ diseases & makes it worse. The healthy people could be affected because they could become sick. That could make somebody out of my family sick. Nobody wants any of their family sick. It's could be helped, they don't got to pollute the air but they constantly keep them to release.

2B

4/30/18

WIC RAQA Title 6 ^{Draft}

Calem Williams

I think they should start using the scrubbers. They should use tougher standards. I myself does not want to get a heart problem or a respiratory illness nor do I want my next generation to get it. My Grandmother lives at towers there and frequently has a cough as well as my grandmothers partner. As a matter of fact we are going to Biltmore Park tonight and I do not want to get sick because of the air around me. We need that to live not to cause us to be sick. Young people will start to get sick. Teenagers go out to Biltmore Park all of the time so to protect the next generation do something to fix it. Such as the scrubbers that we played (6).

WHCA rough titles Draft.

Rumikorichuk 11/30/15

I think that Duke energy should improve their scrubbers. It wont take a lot of money or time to. They need to start caring about the people and the environment, not just themselves and their profit. They need to take responsibility for people getting sick.

Blaze Biddix
Dear Duke Power Co.,

I would like to see a change in your breathing air requirements tightened down on. My little brother has asthma and if this stuff we are breathing in can cause asthmatic attack I want it out of our atmosphere.

Sincerely,
Blaze Biddix

I am an athlete, who plays football, basketball, and golf. I love being outdoors all the time. So if I'm outside all the time that means I'm breathing in ^{so₂}. Please stop the power plant. I think if half the High School students in the country were aware of this chemical we are constantly breathing in. It's not fair for everyone to breathe in something that will shorten our lives. This is murder, please stop the madness.

Title V draft Michelle David

So like I think we 4-30-15
should influence the regulations
and move them in a strict manner.

I think in all honesty, like
do you want to die? do you
know you are basically committing
suicide and or mass murder.

I want you to know and
as you should know there are
kids who are growing up in
this toxic community with a
possibility of death. So let me get
this straight if you shoot
down one it's considered a
crime? But you know infecting
possibly endangering animals is
completely ok? We are on the
breaking point to acid rain kiss
your life well healthy life as
you know it goodbye.

Isaac West

My opinion on it is that you should PA
get yalls butt together and clean our
air. Also because its killing what
little forest we have left, And its
causing acid rain and all this other
bad crap. Also killing these people. That
is just my two cents and I hope
you listen buster. lessen the level
of sox.

JASON

FIX THE TITLE S ACT BECAUSE,

FOX 4-30
15

THERE ARE THOUSANDS OF PEOPLE WITH

ASTHMA AND ALOT OF PEOPLE ARE SUFFERING.

THE SOZ COULD KILL ALMOST OF PEOPLE BY

ASTHMA ATTACKS. I THINK DUKE SHOULD

STOP WHAT THEIR DOING AND TRY TO

FIX WHAT THEY ARE DOING/DID. THIS

NOT ONLY HURTS US BUT ALSO ANIMALS

,PLANTS, AIR, & WATER SO ALOT OF THINGS

ARE BEING EFFECTED.

STEPHEN KETTERMAN 4130114

YALL POISON IS SO DUIT YOU KILL
PEOPLE I THINK ITS DUMB GET A LIFE

WNAO radio titles draft

Yes I agree that they should use the scrubbers to help the air that we breath and they should have been doing that all along so we can have fresher air so kids children will have less chance of them having asthma and other effects and have more body issues. Duke energy has all responsibilities and they were not following them and they should have. Since they have not done there responsibilities and since they didn't follow there responsibilities there are most likely a lot more people today sick with asthma.

Title V Draft

Dear WNAQA

Matthew Lamm

It should make sense that you should not sign it. You should not let innocent people because you are lazy. We should be helping not hurting people. I want live without dying young.

I think they should change it. Or not accept it. Like Mr. Macqueen said it affects peoples asthma and COPD. And the people that are around the plant, have to breath the air constantly. If they/we keep breathing the air they could get sick, more sick or end up dead. SO₂ is killing the environment, trees, animals. If we don't stop the plant/factory it will get worse and worse and worse. We need to stop it or it will make people and our community sick. It isn't safe for children, teens, adults, elders to breath this.
