Application Form

Question Group

Buncombe County requests proposals for projects to help the community recover from and respond to COVID-19 and its negative economic impacts.

Buncombe County has been awarded \$50,733,290 in Coronavirus State and Local Fiscal Recovery Funds (Recovery Funding), as part of the American Rescue Plan Act. This infusion of federal resources is intended to help turn the tide on the pandemic, address its economic fallout, and lay the foundation for a strong and equitable recovery.

Buncombe County is committed to investing these funds in projects that:

- Align to county strategic plan and community priorities
- Support equitable outcomes for most impacted populations
- Leverage and align with other governmental funding sources
- Make best use of this one-time infusion of resources
- Have a lasting impact

Proposals shall be submitted in accordance with the terms and conditions of this RFP and any addenda issued hereto.

Coronavirus State and Local Fiscal Recovery Funds*

Name of Project.

Resurfacing and Replacement of Outdoor Basketball Courts at Charles D. Owen Park and Hominy Valley Park

Amount of Funds Requested*

\$215,000.00

Recovery Fund Eligible Category*

Please select one:

County only

Brief Project Description*

Provide a short summary of your proposed project.

This initiative involves resurfacing the outdoor basketball court at Charles D. Owen Park in Swannanoa and replacing the outdoor basketball court at Hominy Valley Park in Enka-Candler.

Project Plan*

Explain how the project will be structured and implemented, including timeframe.

Once funds have been approved, an RFP will be issued to multiple vendors pursuant to Buncombe County policy. (Estimated cost is based on recent estimates obtained resurfacing of the outdoor basketball court at East Asheville Library.) Following vendor selection, resurfacing and replacement should take place within 12 months. As the project involves outdoor spaces, weather can impact the amount of time between closing the existing courts and completion.

Statement of Need*

Describe the need that this project will address. Include data to demonstrate the need, and cite the source of the data.

According to a study by Missouri State University, public places serve as a source of social status for participants of pick-up basketball and that social status stemming from pick-up basketball varies in importance based on the socioeconomic status of the participants. Further, public places in low-income neighborhoods can serve as a vehicle for establishing social networks in the surrounding community, affirming and maintaining status, and realizing personal fulfillment.

The current basketball court at Hominy Valley Park is well-used. However, as it approaches nearly 50 years of use, it has outlived its lifespan with visible infrastructure crumble and vegetation growing through cracks in the asphalt. The court at Charles D. Owen Park is not in as poor of condition, but needs to be resurfaced to extend the lifespan of the court and improve user experience.

Link to COVID-19*

Identify a health or economic harm resulting from or exacerbated by the public health emergency, describe the nature and extent of that harm, and explain how the use of this funding would address such harm.

As most options for families and community members shut down during COVID-19, public parks saw record-breaking visitation. As restaurants, amusement parks, and other entertainment options have reopened, attendance has not cooled. Our reality is that far more people are visiting public spaces than were originally envisioned – and that number will continue to grow as people retain the sense that outdoor gatherings and activities are safest.

Buncombe County Recreation Services is driven by the primary goal of providing equitable low- and no-cost opportunities for high-quality recreation and active living experiences. There are no exorbitant admission fees or exclusionary policies. Parks build a healthy, active community and aid in the prevention of chronic disease, provide therapeutic recreation services for those who are mentally or physically disabled, counter social isolation by connecting people with nature and each other, and also improve the mental and emotional health of all citizens.

Additionally, parks have been identified by Buncombe County emergency operations leaders as locations that can act as emergency shelter and healthcare locations during times of crisis such as the coronavirus pandemic.

Population Served*

Define the population to be served by this project, including volume and demographic characteristics of those served.

These parks are true community hubs with visitors consisting primarily of those who live nearby. Both are located near neighborhoods that consist of apartment buildings, modest multi-family homes, aging mobile home parks, and new construction. As the overall rate of those covered by health insurance in Buncombe County is lower than the national average, the health and wellness opportunities found in parks are a particular draw for youth and families from low-income pocket neighborhoods near the parks. Buncombe County parks had over 2.5 million visitors last year.

During the pandemic, local counties and municipalities realized having access to parks and open spaces are a necessity. The greatest impact on parks in the foreseeable future will be overcrowding. We must ensure that parks remain a spaces that offer activities critical to childhood development and foster mountain spirit, imagination and creativity, healthy habits, teamwork, social equity, emotional stability, mutual trust, and environmental responsibility.

Results*

Describe the proposed impact of the project. List at least 3 performance measures that will be tracked and reported. If possible, include baselines and goals for each performance measure.

Many community members changed lifestyles to greater incorporate recreation and active living as daily staples within their lives as a result of COVID-19's effects. Now that the public has a renewed awareness of recreational opportunities, it is imperative that Buncombe County capitalize on this momentum to build and encourage healthy habits within those who live within the county boundaries. Buncombians are engaging in lifestyle changes that will ultimately save the County money in the coming decades and this is a chance to show leadership as a local government.

- Increase or decrease in visitation to these parks
- Satisfaction scores on surveys by basketball court users
- Amount of time courts in use

Evaluation*

Describe the data collection, analysis, and quality assurance measures you will use to assure ongoing, effective tracking of contract requirements and outcomes.

- Increase or decrease in visitation to these parks (measured by digital car counters)
- Satisfaction scores on surveys by basketball court users (optional demographic information will be added to collected data on future surveys to track equity impact and community engagement)
- Amount of time courts in use (measured by random site visits throughout the year)

Equity Impact*

How will this effort help build toward a just, equitable, and sustainable COVID-19 recovery? How are the root causes and/or disproportionate impacts of inequities addressed?

It is not enough to build a park and expect people to come. For-profit amusement and recreation entities such as Biltmore, Navitat, and local outdoor outfitters are focused on user experience, but those are not options for many residents from low-income households. Buncombe County's public parks (and safe connections to nearby low-income and majority minority neighbors via greenways, sidewalks, bike lanes, and

natural trails) represent the promise of welcoming spaces and equal access for all. In many communities that have seen disinvestment, parks are ground zero for civic commitments to be made or broken. We demonstrate care through asking residents and delivering on those commitments.

What does this look like in a post-pandemic world? We cannot solve our problems with the same thinking we used when we created them. It is well documented that years of neglect and disinvestment have saddled our lowest income neighborhoods more exposed to pollution, natural disasters such as flooding, and health disparities. By reducing litter and greenhouse gas emissions at these large regional parks, we seek to deliver the proven environmental, health, economic, and social impacts of greener parks and open spaces for low-income households and BIPOC park users.

Project Partners*

Identify any subcontractors you intend to use for the proposed scope of work. For each subcontractor listed, indicate:

- 1.) What products and/or services are to be supplied by that subcontractor and;
- 2.) What percentage of the overall scope of work that subcontractor will perform.

Also, list non-funded key partners critical to project.

All supplies and labor will come from subcontractor(s) with an emphasis on engaging companies with women and BIPOC owners in the RFP process.

Capacity*

Describe the background, experience, and capabilities of your organization or department as it relates to capacity for delivering the proposed project and managing federal funds.

Buncombe County Recreation Services has been the trusted steward of the county's parkland for decades and continues to serve the public by providing, protecting, and preserving a unique collection of 21 outdoor and indoor recreational facilities – which we see as a core service to the people of Buncombe County. We believe our community is a better place when everyone from infants to retirees have the opportunity to be strong, healthy, and successful. Our projects and programming represent a primary goal of low-cost, equitable, inclusive wellness and therapeutic opportunities that are accessible to all residents regardless of cultural, physical, cognitive, or socioeconomic background to create a livable, healthy, and vibrant community.

Budget*

Provide a detailed project budget including all proposed project revenues and expenditures, including explanations and methodology. For all revenue sources, list the funder and denote whether funds are confirmed or pending. For project expenses, denote all capital vs. operating costs, and reflect which specific expenses are proposed to be funded with one-time Buncombe County Recovery Funds.

Special Considerations*

Provide any other information that might assist the County in its selection.

A 2018 Penn State study examining the impact of the Great Recession found that local park and recreation agency funding plunged 21% between 2009 and 2013. No local government service — public safety, education, or transportation — suffered as much. Equitable and accessible parks, recreation, and active living spaces are essential to addressing the Buncombe 2025 focus areas of an educated and capable community, environmental and energy stewardship, resident well-being, and a vibrant economy:

- Promote community resiliency and wellness by providing better mental health, improved physical health, and increased physical activity by providing safe multigenerational spaces for popular sports, adaptive and inclusive play, greenways and hiking trails, swimming pools, and many other activities designed to promote active lifestyles.
- Critical to childhood development and foster mountain spirit, imagination and creativity, healthy habits, teamwork, social equity, emotional stability, mutual trust, and environmental responsibility.
- Drive economic opportunity by expanding the local tax base through support of the outdoor recreation economy, increased tourism, and attraction and retention of businesses.
- Build healthy, active communities that aid in the prevention of chronic disease, provide therapeutic recreation services for those who are mentally or physically disabled, counter social isolation by connecting people with nature and each other, and also improve the mental and emotional health of all citizens.
- Provide cost-effective and sustainable environmental solutions while preserving the culture, beauty, and well-being of our region.
- Improve water quality, protect groundwater, prevent flooding, preserve ecological splendor, improve the quality of the air we breathe, provide vegetative buffers to development, and produce habitat for wildlife.
- Have the transformative power to connect communities, preserve culture, and change lives.
