Narrative summary of grant related activities

This past year we have been able to partner with local foster care experts at Caring For Children to raise awareness of the need for foster parents for LGBTQ+ youth. Through informational events, radio advertisements, social media and communication campaigns, we have been able to reach over 2500 people, greatly surpassing our annual goal of 750. Largely thanks to the grant, we have been able to utilize local radio stations and popular streaming service, Spotify, to assist in getting factual fostering information out to the public. With the assistance of the grant, fostering experts were able to host multiple informational sessions and fostering trainings. Due to the change in leadership, we are unable to accurately report the exact amount of families who provided foster care throughout the year but we are confident it exceeds the original goal of 8. We are pleased with the results and grateful that the grant allowed us to increase awareness for LGBTQ+ fostering needs.
