Strategy 4: Increasing Efficiencies in Case Processing

Strategy Overview

• Strategy four is Increasing Efficiencies in Case Processing and addressing the length of time people who are awaiting trial spend in the detention facility.

• Under this strategy, we will implement four activities for an estimated jail bed reduction of 31 beds per day.

Activities

1. Implementing a bail alert report for individuals in custody to notify criminal justice system actors when individuals in custody are due for a bond review.
2. Implementing a court date reminder system to reduce failure to appear rates.
3. Expanding jail-based case processing.
4. Creating alternatives to custody for civil non-support.
Case Processing Workgroup Timeline
(as of December 2019)

- **Grant Received**
  - Workgroup Established
  - Consult IT and AOC regarding data for court notification system
- **Contract development with AOC and IDS**
  - Recruit and Hire for ADA and APD
  - Onboarding process for ADA and APD
- **Defining responsibilities of ADA and APD**
  - Defining parameters for bail alert system
- **Consult with IT for functionality of court notification and bail alert systems**
  - Conduct in-depth case review for closed cases
- **Implemented bail alert system**
  - Process map cases assigned to SJC ADA and APD
- **Implementation of court notification system within pretrial services**
  - Analyze data revealed from in-depth analysis
- **Control for court notification, bail alert systems, case processing efficiencies**
  - Brainstorm and implement ways to improve efficiencies in case processing
  - Monitor future state

- **Already completed**
- **To be completed**
