

# Strategy 5: Improving Data Utilization

## Strategy Overview

- Strategy five, **Improving Data Utilization**, is a supportive strategy, and while not associated with a numerical jail bed reduction goal, supportive strategies are necessary to ensure that we can implement reduction strategies successfully.
- This supportive strategy is also essential to efforts to reduce racial and ethnic disparities in the jail.

## Activities

1. Developing a Data Usage Agreement in collaboration with institutional data partners
2. Utilizing existing data to improve and automate processes in each of the strategic areas
3. Working with partner agencies to develop mechanisms for data tracking
4. Launching applications to enhance case processing
5. Use data to monitor our progress via a SJC dashboard and make this dashboard available to SJC sponsors and leaders on a daily basis.
