PSA Release Recommended by Supervision Track

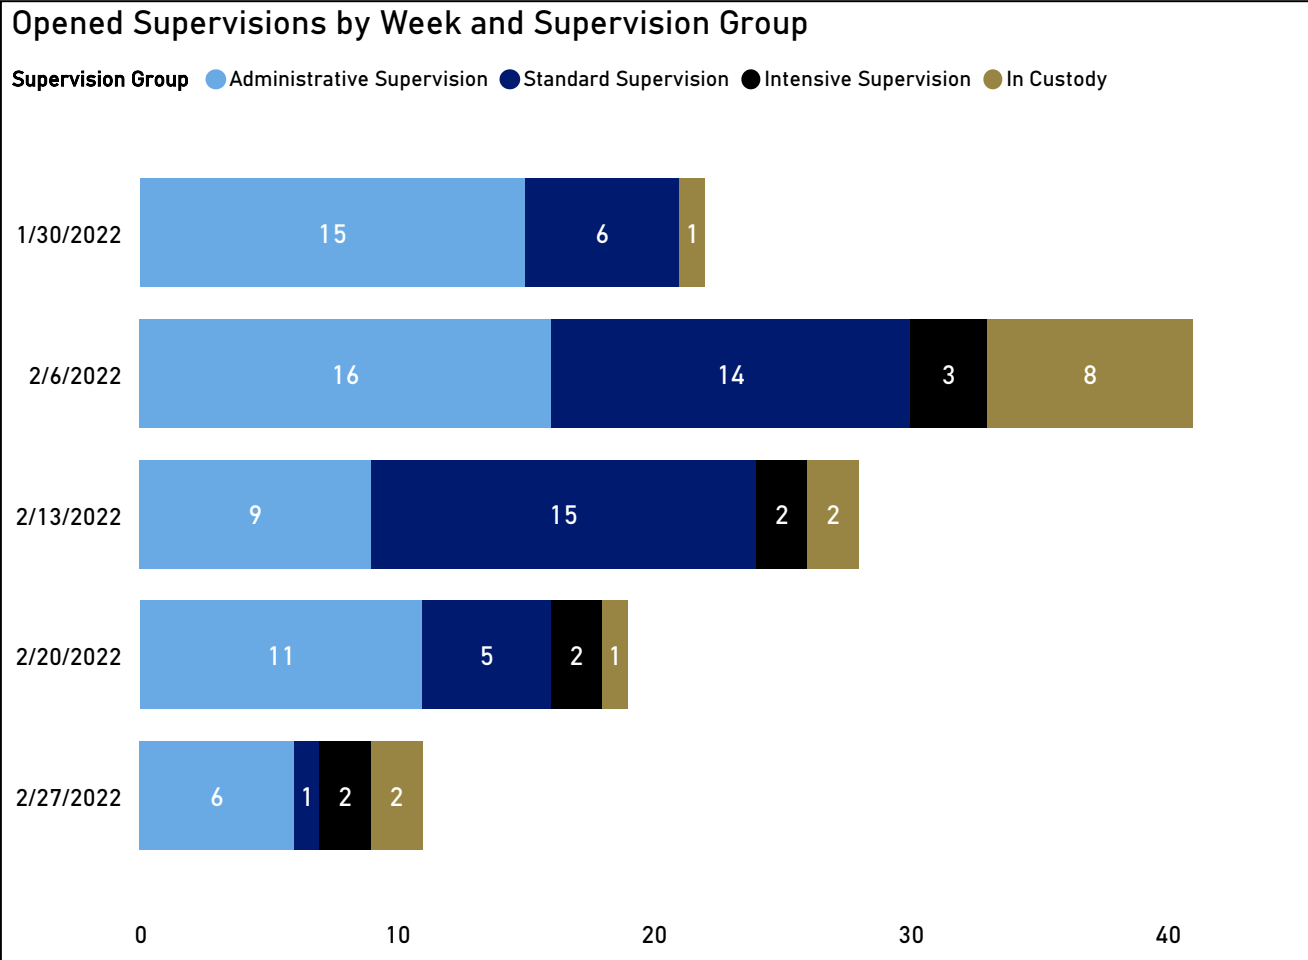

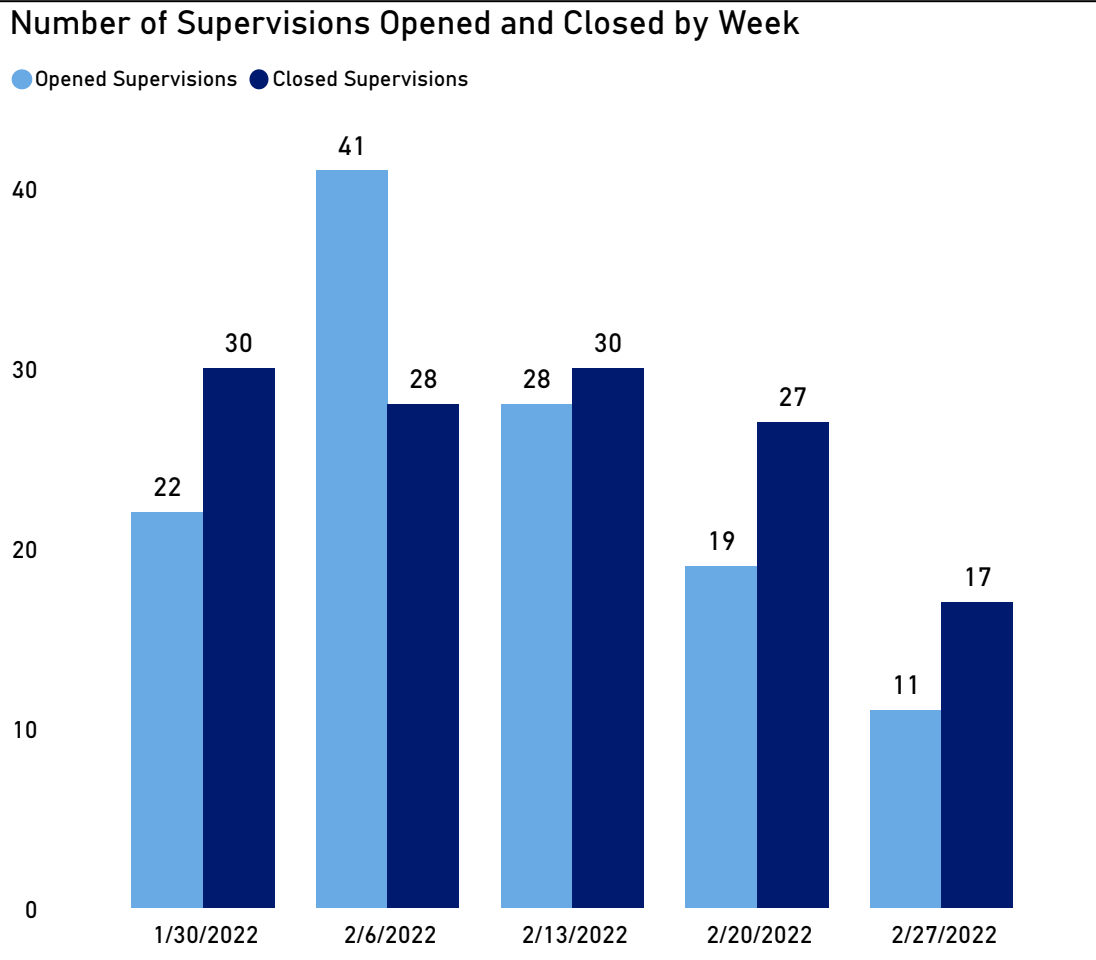

February Assignments and Closures

121 Supervisions Opened

132 Supervisions Closed

A person can be referred to pretrial supervision by a district or superior court judge. They can be assigned to supervision on more than one charge or might not be referred to supervision for all pending charges. For the purposes of this report, a supervision is counted as one supervision regardless of the number of charges they have been referred to supervision for. For example, if a person has six pending charges in Buncombe County, and they have been referred to Pretrial on four of those charges, that is counted as one supervision.

Fiscal Year 2022 Technical Violations

1,256
Closed Supervisions

133
Closed - Technical Only

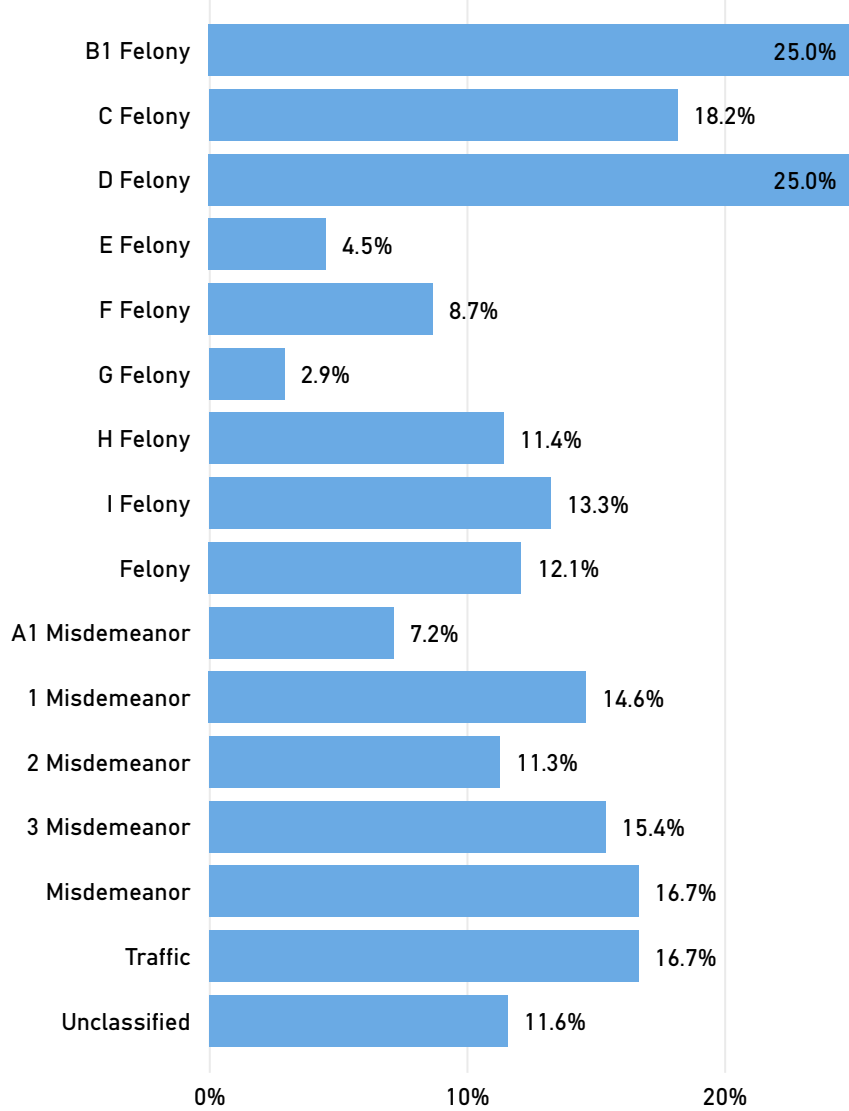

Technical Violation Rate
10.6% ✓
Goal: 14.8%

When a supervision is closed, it is flagged as successful or unsuccessful. Unsuccessful supervisions are closed due to the following reasons: a new charge occurs, an individual fails to appear in court, an individual violates release conditions (technical violation), or some combination thereof. A closed supervision that is unsuccessful is counted as a technical violation if "technical violation" is the only disposition reason identified on the supervision.
